SELECTMEN'S REPORT.

At the annual meeting in March, the citizens of the town, by a very complimentary vote, re-elected the old Board of Selectmen, for which mark of confidence and thrice repeated honor, indicative so far forth of approval on the part of the town of our doings for the two previous years, your Board would, at the outset of their report, record grateful acknowledgments.

The work of the present year has been that of general repair. No new streets have been built. Your town teams and laborers have been employed on nearly every thoroughfare within the town limits, some of the highways requiring no inconsiderable outlay, while others have been worked sufficiently to keep them in good condition.

Highways and Bridges.

Appropriation,	$10,000 00
Brick and concrete sidewalks,	500 00
Appropriation Nov. 13th,	1,000 00
	$11,500 00
Expenditures,	10,763 32
Balance unexpended,	$736 68

Arlington Avenue.

In our last report reference was made to the defective condition of that portion of the avenue between Lake Street and Alewife Brook. Early in the season, the town force labored on this part of the highway, repicking two sections of the avenue, between the above-named points, and making anew the road-bed with crushed

stone. The centre of the avenue receiving a depth of seven to eight inches of stone, and gradually tapering to nothing on either side. The road-bed was regravelled from the town pit. That portion of the avenue, situated in the immediate proximity of the brook, is the more especially noticeable. The many depressions in the road-bed, resulting from heavy teaming in connection with its naturally level surface, have hitherto caused pools of standing water during the winter and spring months, much to the annoyance of those teaming or driving over it. The easterly side of the avenue, from the brook almost to Lake Street, is defective in drainage. The surface water often remains in early spring along the side of the road and between the rails of the horse railroad, and sometimes, after the heaviest rains, backs up, so as to overflow the yards and premises of the abutters on the avenue. This defect can be remedied, at no great expense, by constructing a surface drain, running parallel to the horse car railroad, and emptying into Alewife Brook. A short section of the avenue, above the foot of the rocks near the willows, has been regravelled. The avenue is to-day in excellent condition, excepting a small portion near the Lexington line, which will require attention early in the spring. A concrete gutter has been made opposite the Unitarian Church, and road crossings constructed on the avenue. The culverts have all been cleaned and the gutters cleared from the wash of the streets.

Summer Street.

Reference has heretofore been made relative to the ledge, situated on Summer Street, at a point in the curve of the road and within a few feet of the Middlesex Central Railroad. The general depression of all industrial interests at the opening of the year, coupled with the usual stagnation during the winter months, the openness of the winter, and hence complete cut off from labor of that class of our citizens, dependent upon the cutting and storing of ice to tide them over the dull season, caused frequent application to be made for aid to the Overseers of the Poor. Your Board, necessitated by the exigency of the case, either to give alms or work, and believing that the town should receive some adequate remuneration for help thus afforded, decided to commence work upon this ledge, and reduce it to level with the street. With a

view to render aid to the greatest number, the force thus employed was divided into three gangs, each gang working but two days during the week. The stone from the ledge was broken by hand. A large quantity was piled for future use on land belonging to estate of Cyrus Cutter. The road-bed was thus increased to a width of thirty feet and macadamized with the ledge stone, for a distance of four hundred feet and then top-dressed with gravel. In the employment of men, at such times, with a view first of assisting them through the winter, and secondly, through their labors, to improve the town, it is one of the most difficult problems to draw the line between the really deserving to whom aid in some form is imperative, and others, not by any means in good circumstances, and yet having sufficient laid by to carry them through the winter. Certainly the dress of the applicant, his mode or style of living affords no certain criterion of his immediate wants. Without doubt married men with families, residents of the town, other things being equal, ought first to receive attention. Exceptions were taken, at the last town meeting, relative to the needs of the working force employed early in the season on this ledge. It was alleged that men were employed who could have cared for their families without this extra work, and that, too, to the exclusion of others in needy circumstances. In reply to this, your Board would say that possibly from want of definite knowledge—from falsehood on the part of the applicant or misstatements on the part of those from whom inquiries were made—men may have been employed who could have lived without such assistance, but in every case the Board must act from the best information at hand, and we respectfully submit, whether it would not be better for that citizen who, from actual knowledge, knows of the employment of undeserving men at such times, to enter his protest to the Board, than the other course of noting the fact, and then appearing in town meeting eleven months after the completion of the work, enter a complaint against the Selectmen for the injudicious selection of men assisted by the town.

Charlestown Street.

The street is in excellent condition. A small portion of the highway near Alewife Brook has been crowned and top-dressed with gravel. Aside from this no expenditure has been made, other

than that of general repair to which all of our streets are yearly subject.

Mystic Street.

The gutters of this street have been cleared and the road-bed crowned, from a point near estate of Luke Wyman to land of Mr. Huffmaster. The sidewalk on the easterly side of the street, fronting land of Mr. Davis, has been raised and rough finished, the abutter furnishing the gravel for the same. Mr. Davis, at his own expense, has reset his fence, for a distance of about five hundred feet to correspond with the street, thus making a much needed improvement. Two drains have been laid, one opposite residence of Wm. Stowe, being an eight-inch cement pipe, extending across the street, easterly, to a distance of eighty feet; the other near land of Mr. Huffmaster, being a twelve-inch pipe, running in the same direction about one hundred feet; both these drains receive the surface water from the street and the high land on the westerly side. The gutters on old Mystic Street, so-called, meaning that portion cut off by the new line, have been ploughed, the road-bed crowned. This road from its infrequent use warrants but small outlay on the part of the town.

The concrete gutter on the westerly side, near the site of the old pound, has been relaid. The old gutter, from its insufficient size and unworkmanlike construction, has been entirely removed and replaced with one of increased width, greater capacity and durability. We have now a concrete gutter, from four to six feet wide, resting on a solid base of tarred stone, extending from residence of Geo. Winn to Mill Brook, and capable of taking all the water, even after the heaviest rains.

Lewis Avenue and Franklin Street.

These streets, recently accepted by the town, were repaired and put in good condition last season. The introduction of water pipes the present year, has left the streets again in a rough state, which will necessitate some repairs another year. The annual expenditures for highways and general management of town affairs, are kept separate and as entirely distinct from the water account as though each were a corporation by itself. When therefore the

town grades, macadamizes and gravels a new street or repairs an old highway, all cost is charged to the appropriation for highways. If now, subsequently, the Water Board decide to introduce water, the street through which the pipe is to be laid, must again be disturbed, trench dug and refilled, leaving an embankment or mound marking the whole length of the pipe thus laid. This mound will in time settle in part, but not to a level with the highway. It has been the custom, after allowing sufficient time for the gravel in the trench to settle, for the town force to level the street and repair the road-bed, thus compelling the town virtually, in part at least, to do their work over again. So far as possible, the Water Board and Selectmen have acted together in the laying of the water pipes and subsequent repair of the streets, but we affirm, that where a street is in good condition, and the Water Board are obliged to open the same either to lay new or repair the old pipes, not only the actual expense of digging and refilling the trench should be charged to water account but the cost of levelling the street and putting the same in as good condition as before. This after work of smoothing the road-bed has always been done by the town and charged to highway account, thus benefiting the water account at the expense of the highway appropriation. It will be seen from this, that where water is first introduced through the streets of a town this after labor would form no inconsiderable item of expense and even after the pipes are laid, the highways must be frequently opened, for repair of main and service pipes, through imperfection of pipe, action of frost and like causes.

Eastern Avenue Extension.

The construction of this avenue, at the time of publishing our last report, was well under way. Owing to the lateness of the season when the work was commenced, and hence shortness of the days and delay from frost, the cost of building the road was materially increased. Early in the season the avenue was completed at an expense within the appropriation. The ascent from Highland Avenue to the summit of the hill being very rapid, this avenue will annually require some outlay, on account of repairs from the wash of the early spring rains. The road-bed is in good condition. No sidewalks have been constructed on either side,

the Board believing that no outlay should be made for walks at present.

Appropriation,	$2,500 00
Estimated expenditure,	2,200 00
Unexpended,	$300 00

Park Avenue.

The most important and expensive work performed within the town limits, the present year, has been on Park Avenue. The heavy spring rains washed and gullied the road-bed to such an extent, as to give the lower part of the avenue near its junction with the main street a decidedly chaotic look, presenting at once the problem, what to do and how best to do it, so as to restore the avenue to its former condition and at the same time have permanent work. The main difficulty appeared to arise from the insufficient size of the gutter to carry off the surface water. We have built a concrete gutter in width from four to six feet; extending a distance of twenty-six hundred feet. At the crossing of Park and Arlington Avenues, two drains have been constructed, with suitable granite openings and iron gratings, one for a distance of one hundred and thirty feet, being a thirty-inch brick drain, the other for a distance of thirty feet, also of brick, two feet in width, both emptying into Lewis Mill Pond.

The road-bed of the avenue has been levelled, crowned and top-dressed with blue gravel. While the labor performed has been expensive, we feel that it has been thoroughly done, and will, in the end, prove to have been the most economical method which could have been adopted.

Watering Streets.

The advantage derived from sprinkling a portion of the highways last season, as a measure of economy, was so apparent, that as soon as the dry season commenced, a subscription paper was circulated, under the direction of the Selectmen, among those of our citizens living on that portion of the highway which we proposed to sprinkle, soliciting from the abutters a proportionate part of the expense. The amount thus subscribed was $236.

The Board, instead of hiring outside parties to do the work, as heretofore, made use of the town horses and watering-cart. Pleasant Street has been sprinkled from the centre to Lake Street; the avenue from estate of J. P. Wyman to the Baptist Church. As the season advanced, and the weather became cooler, requiring less frequent trips, the line of watering was extended to the foot of the rocks.

The water has heretofore been taken from stand-pipes connected with the street hydrants. The Water Board claimed that the constant opening and shutting of the gates to supply the watering-cart, endangered the hydrants, while the connection of the stand-pipe with the outlet to which the fire-hose is attached, made the water supply less available in case of fire. Your Board, therefore, caused four stand-pipes to be erected, connecting them with the main pipe. These are of the same pattern as made use of in our neighboring cities. The cost of these stand-pipes was about $500. If the town should conclude to water the streets more extensively in the future, other pipes must be erected, as the occasion requires.

Cemeteries.

Appropriation,	$300 00
Received for lots sold,	150 00
	$450 00
Expended,	345 63
Balance unexpended,	$104 37

The cemeteries for the last season have been under the supervision of Mr. Hartwell. The gates have been painted and a light coat of gravel spread upon the main walk, a new harness purchased for the hearse carriage. Aside from this there has been no expenditure the present year, other than that of the general care of the grounds.

Concrete or Brick Sidewalks.

Appropriation,	$500 00
Transfer to Highway appropriation,	500 00

The work of concreting has been done by the town the present year. The tools required for the work are comparatively

inexpensive. The Gas Company furnishes the town with tar at the price paid by dealers for the same in large quantities. The Board deems this change as highly advantageous to the town, both as regards the character of work performed and saving in cost.

Town Bonds.

Proposals have been twice issued during the year, to the leading bankers and brokers, soliciting bids for Arlington Water Scrip. This course has proved the only fair way of disposing of the bonds. The dealers are brought into close competition with each other and the town saves the commission on sales at public auction.

Total amount of scrip sold,		$24,000 00
Jan. 29, Brewster, Basset & Co.,		
$14,000 at 103.65,	$14,511 00	
May 10, Brewster, Basset & Co.,		
$10,000 at 106.16,	10,616 00	
		25,127 00
Amount of premiums received on sales,		$1,127 00

Street Lamps.

Appropriation,	$1,500 00
Expended,	1,398 75
Unexpended,	$101 25

Your Board were instructed at the adjourned annual meeting, to institute inquiries and make experiments with a view to the adoption of a more economical method of lighting the highways. Several towns in our vicinity are using kerosene in their street-lamps, but the loss in illuminating power as compared with gas, the constant breakage of chimneys and smoky condition of lanterns attest very unsatisfactory results. The street-lamp at the corner of Arlington Avenue and Pleasant Street, was fitted early in the summer with patent reflectors, by which it was claimed less gas would be consumed and greater illuminating power obtained. Your Board, however, from constant observation of its workings, regarded the result as one of doubtful utility, and caused the same

to be removed. We are unanimous in the opinion that the only way to properly light our streets, is by the use of gas.

Any change to naphtha, kerosene, or any of the illuminating oils, in addition to the expense necessary in removal of old fixtures and affixing the new, would be far from satisfactory to the citizens. A street well lighted, is to a certain extent well guarded, and so far forth lessens the appropriation for police.

Coal.

The Selectmen, in connection with the School Committee, were empowered to contract for the supply of coal used during the year. Owing to the unsettled state of the market, no bids were solicited until late in the season. The contract, with the usual considerations as to quality, was awarded to Messrs. Horatio Wellington & Co., they being the lowest bidders, at the following prices:

Furnace,	$6 22
Egg and stove,	6 52

Sign Boards.

In compliance with law, sign boards have been erected on Winter Street, Pond Lane and Highland Avenue.

Outside Poor.

Appropriation,	$1,000 00
Carried from income of Poor Widows' Fund,	200 00
	$1,200 00
Expended,	1,227 02
Expended over appropriation,	$27 02

In our yearly recommendations of the various sums necessary for the town to appropriate, none are so difficult to arrive at, none so problematical, as the amount requisite for outside poor. The continued stagnation of mercantile interests and hence scarcity of

employment for the laboring man, especially during the last twelve months, has greatly increased the number of applicants for aid and added much to the labors of the Overseers of the Poor.

In 1874, the town appropriated five hundred dollars and of this amount at the close of the year, nearly two hundred dollars remained unexpended; in 1875, six hundred dollars was granted and the disbursements amounted to more than seven hundred dollars; at the annual March meeting of the present year, the town appropriated one thousand dollars, and we have kept nearly within the limit, through income of Poor Widows' Fund.

The expenditures of the last two years, afford at a glance a correct epitome of the increased hardships of our working classes. Unless business interests brighten very materially during the coming year, your appropriation for outside poor must be largely increased. To keep within the limits of the appropriation, and at the same time grant aid to those of the town's poor, compelled by necessity to solicit it, has been impossible; actual want admits of no red tape delay, assistance to be effectual must be speedy. The appropriation must be large, or the indulgence of the town granted, if in this one item of expenditure the limit of the funds is exceeded. In every other account the remedy is easy. Let the highway funds be exhausted, we can stop work, but you cannot withhold aid, in times like these, from those of your citizens suffering for the bare necessaries of life. In comparison with other towns we have much cause for congratulation, on our freedom from pauperism. We have but one inmate at the almshouse. Where is the town, possessing an almshouse, within a radius of twenty miles, that can show a like record?

The town of Brookline appropriated at its last annual meeting four thousand dollars for the support of outside poor, and yet in a printed report of the Selectmen under date of Dec. 12, 1876, they state, that the expenditures for the poor for the year will cost more than eight thousand seven hundred dollars, exclusive of all bills for medical attendance. In other words they have exceeded the annual grant nearly five thousand dollars. We cite this instance, simply as one of many, showing how utterly impossible it is, in times other than ordinary, for your Board to make even an approximate estimate of probable expenditures under this head.

Police.

Appropriation,	$500 00
Appropriation Nov. 13th,	700 00
	$1200 00
Expenditures,	607 50
Unexpended,	$592 50

In the report of John H. Hartwell, Chief of Police, to the Selectmen, the following items may be of interest. Whole number of arrests for the year 79, males 69, females 10, assault and battery 33, drunkenness 23, other causes 23. Prior to April 1st, the number of policemen on duty was three. The curtailment of the appropriation recommended at the annual meeting, compelled the discharge of all the officers but one, who, with special assistants on holidays and public occasions, remained the sole guardian of the peace, until Nov. 13th, when the town made the additional appropriation of seven hundred dollars.

The peculiarity and impulsiveness of some of our town meetings, is very strikingly exhibited in this instance. At the March meeting, five hundred dollars was thought a sufficient grant for maintenance of the police force for the year of fifty-two weeks, while at the November meeting seven hundred dollars was appropriated for only six weeks. If the town should appropriate for the year to come in the same ratio, the annual cost of police would exceed five thousand dollars. The Chief of Police recommends the maintenance of a night force, for three sections of the town, to wit, upper, lower and centre. The station house is in good condition, no repairs being necessary. While the number of arrests have increased, the wonted quiet and order of the town has been the same as last year. It will be remembered that at the annual meeting the Board recommended an appropriation of fifteen hundred dollars. This increase in amount asked,—largely in excess of the grants of previous years,—was caused by the revival of interest among our citizens in the cause of temperance. It was evident to the Board, that if the town saw fit to instruct the Selectmen to grant no licenses for the sale of intoxicating liquors and to see to it that no sales should be made, either

the appropriation for police must be materially increased, thus giving the Selectmen the wherewithal to enforce the law, or the citizens should resolve themselves into committees and thus put a stop to the liquor traffic.

The enactment of the Legislature of 1876 grants authority to any two persons, of full age and competent to give testimony, to make complaint against any person engaged in the illegal sale of intoxicating liquors, before any justice of the peace, and obtain a warrant for search of premises and seizure. The town saw fit to pass a resolution early in the season, virtually instructing the Selectmen to grant no licenses and at the same meeting refused to appropriate more than five hundred dollars for police. The appropriation, thus cut down, completely nullified the anti-license resolution. Many petitions were laid before the Board, but leave to withdraw granted the petitioners in every case. It is doubtless a fact, that intoxicating liquors have been sold in town during the current year and in quantities perhaps exceeding sales of previous years. The limited appropriation, insufficient to pay the monthly salary of the Chief of Police and the special officers temporarily employed, rendered our hands powerless for the enforcement of the prohibition act. A law that from any cause is inoperative, is worse than no law. A law constantly broken, commands but little respect. In the light of the last twelve months two practical solutions of the whole question become apparent—either grant a limited number of licenses thus restricting the traffic—improving the quality of intoxicants sold, and increasing the funds in the treasury from license fees; or instruct your Selectmen to issue no licenses, at the same time, increasing the appropriation for police, thus granting the means with which to drive the traffic beyond the limits of the town.

Tramps.

The number of tramps fed and lodged at the Almshouse for the year was 780; in addition, some 25 to 30 have been cared for at the station house. The number of vagrants above given, may seem at first large, but is not much in excess of last year. About forty per cent. of the whole number are Saturday night visitants, of whom no work can be required. The law, empowering the Selectmen to enforce labor from this class of applicants in return for food and lodging, is a salutary one, and a needed step in the right direction.

Town House.

Appropriation,	$400 00
Rents,	603 50
	$1,003 50
Expenditures,	884 82
Unexpended,	$118 68

Almshouse.

Appropriation,	$1,600 00
Expenditures,	1,531 07
Unexpended,	$68 93

Counsel Fees.

Appropriation,	$250 00
Expenditures,	225 00
Unexpended,	$25 00

Fire Department.

Appropriation,	$2,300 00
Expenditures,	2,272 09
Unexpended,	$27 91

The Fire Department has been under the charge of Chief Engineer Hobbs, to whose report, herewith annexed, reference may be had.

Incidentals.

Appropriation,	$1,600 00
Received from auctioneer's licenses,	6 00
	$1,606 00
Expenditures,	1,542 40
Unexpended,	$63 60

State Aid.

Appropriation,	$500 00
Expenditures,	387 00
Unexpended,	$113 00

Salaries.

Appropriation,	$4,100 00
Unexpended balance brought forward,	1,300 00
	$5,400 00
Expenditures,	4,783 33
Unexpended,	$616 67

Town Debt.

The amount of town notes due and liquidated the present year was $6,000. Notes amounting to $16,200 fall due in 1877. The greater part of this indebtedness is drawing interest at seven per cent. This debt could be funded by other notes, at a less rate of interest, for a term of years, but with our water loan increasing from year to year, your Board would recommend that the amount of these notes maturing in 1877 be raised by taxation. The amount thus to be raised seems large but the indebtedness of the town maturing from year to year until 1882 is light and can be easily liquidated.

Superintendence of Streets.

Three years ago, at the outset of our official duties, Mr. S. E. Kimball was reappointed Superintendent of Streets. The neatness and good repair of the Almshouse, under his immediate charge; the durability and finish of roads constructed under his

supervision; his success in handling gangs of men, and superior faculty of keeping sufficient work ahead, that no time may be lost between the completion of one class of work and the commencement of another, attest sufficiently the value of his services, without comment from us.

Respectfully submitted,

JOHN SCHOULER,
JAMES DURGIN,
WILLIAM G. PECK,
Selectmen, Town of Arlington.

ARLINGTON, Dec. 30, 1876.

REPORT OF WATER COMMISSIONERS.

The Water Commissioners herewith submit the required report for 1876, "of all their acts and doings, and the condition of the property under their control, with such recommendations as they judge the interests of the town require." The property under their control has been cared for and kept in repair during the year, and is now in good condition. From the income collected in 1876 there have been paid all the running expenses for the year, including the laying of all new service pipes needed, and the building of a filter, and also $6,319.67 towards the interest on Water Scrip. The details of income and expenditure are shown by the Treasurer's report, which accompanies this.

In the months of January and February a settlement of claims for damages was made with O. M. and C. F. Winship, John A. Russell, Wm. H. Slocum and John H. Blodgett.

After the annual town meeting the Commissioners, having been duly qualified, met and organized by choosing R. L. Hodgdon, President, and B. Delmont Locke, Clerk. Subsequently they appointed Sylvester Stickney, Superintendent, and B. D. Locke, Registrar. They addressed themselves at once to the settlement of the numerous disputes about water bills, that existed at that time. These bills were all adjusted before July 1st, and since that time the Rules of the Water Works have been strictly and impartially enforced. The very gratifying increase of income attendant upon this course gives reason to hope for a time when the Water Works will be self-sustaining. There has been found difficulty in enforcing that part of Sec. 15 of the Rules, which relates to the use of water for building purposes. Much of the building in town is done by persons coming from other towns. Sometimes there has been no return made of the amount of water used. To obviate this difficulty it is recommended that the following addition be made to that part of the rules referred to, "and a sufficient amount

of money to pay for the same to be deposited with the Town Treasurer before the water is used." This will simply apply the rule of prepayment to this case.

Settlement of Claims.

Since the annual town meeting a settlement of claims for land damages has been made with the following parties : — Lucy Gammell, Ellen A. Stone, executrix, Nathaniel Peirce, heirs of Eben and Nabby Peirce, Jeremiah Russell, heirs of Charles A. Crane, J. A. P. Peirce, Lewis P. Bartlett, heirs of Thomas Teel, heirs of Nathaniel Hill, heirs of Wm. L. Smith, O. M. Winship and Billings Smith. In several of these cases the money has not yet been paid, but will be as soon as the titles are completed. The claims of Luke C. Childs, L. C. Redfield, administrator, A. W. Bryant, H. K. Osborn and Daniel Cahlane who had brought suits against the town, have been settled and the suits withdrawn. There are two small parcels of land which were taken in July, 1873, and to which the Water Commissioners have not yet got a title, but which will be paid for whenever the proper parties present themselves and give a satisfactory title. The foregoing comprise all the claims arising from the introduction of water, which have come to the knowledge of the Commissioners except those concerning which suits are pending, and these have been left in charge of the Selectmen, in accordance with the wish of the town as expressed by its vote at the annual meeting. This divided responsibility does not seem natural or favorable to the interests of the town, and is liable to be attended by unpleasant complications.

New Pipes.

The town instructed the Commissioners to lay pipes in Lewis Avenue and the extension of Franklin Street, and made an appropriation of $1,500 for the purpose. Four-inch cast iron pipes have been laid in each of these streets and the requisite gates and hydrants put in at an expense of $1,011.27. The town authorized the laying of pipes in Teel and Henderson Streets, and appropriated $1,500 to defray the expense. After getting the necessary guarantee of rights to lay pipes and also that no land damages should ever be claimed in case these streets should be accepted by

the town, the Commissioners laid four-inch cast iron pipes in them and put in the necessary gates and hydrants at an expense of $978.12. The price of iron and of labor being less than had been estimated, these pipes were laid for considerably less than the appropriations. It is advised that the unexpended portion of these appropriations be devoted to laying pipes in any places, in which the income from water rates will be not less than six per cent. on the outlay.

Fencing.

An appropriation of $300 was made for fencing. This appropriation will be ample for the next year, as only $89.96 has been expended.

Brown's Brook and Great Meadows.

Surveys and plans have been made which show that Brown's brook can be turned into Slocum's pond for a much smaller sum than the $5,000 which was appropriated. Owing to the lateness of the season when the Commissioners fixed upon a plan and were ready to begin the work, it was thought advisable to defer it till next year. When this brook is turned, as proposed, the Great Meadows will be entirely under the control of the town and can be prepared for use as a storage reservoir at small expense which can be paid out of the appropriation for the brook, if the town will so direct. This is recommended.

Filter.

The Commissioners, hearing many complaints about the quality of the water, and learning that some persons were relinquishing its use, early in the spring put a screen just below the surface of the water, where it enters the well-house in such a manner that the supply for the town should be taken through this screen instead of from the bottom of the reservoir, as had been the case up to this time. This was followed by some improvement in the quality of the water, but not a satisfactory one. The various methods of filtering were then investigated. It was found that any method of artificial filtering would be too expensive for this town. A deposit of coarse gravel, suitable for a natural filter, was

discovered on the north-easterly border of the reservoir, extending a few hundred feet. At this place a filtering gallery was constructed 135 feet in length, and 12 feet in width. The earth was excavated to the depth of 12 feet. The ends were walled up with stone. Stone walls four feet in height were built on the sides and on these was sprung a semi-circular brick arch eight inches thick. From the easterly end of the gallery and in the direction of the main supply pipe, below the gate house, there extends for about 600 feet a conduit, consisting of a brick arch 20 inch span, sprung upon a scow bottom From the end of the conduit an iron pipe 12 inches in diameter extends to the main supply pipe with which it will be connected as soon as the reservoir is filled so as to fill the filter and wash it out. The water running through the filter now is clear and colorless. The excavation and filling for the filter were done under the direction of Mr. S. E. Kimball, Superintendent of Highways. The Commissioners desire to express their satisfaction with the energy and efficiency with which the work was conducted. The filtering gallery is a substantial piece of masonry which, it is hoped, will be permanently serviceable to the town. A natural filter, situated as this is, by the side of an artificial reservoir, may in time become clogged. Most filters are situated by the side of natural bodies of water, generally running streams, the spring freshets in which are supposed to wash away the sediment and to prevent clogging. This condition can be imitated to a certain extent, in our case, by keeping the waste gate open whenever the water is running over the waste weir. Should clogging ever

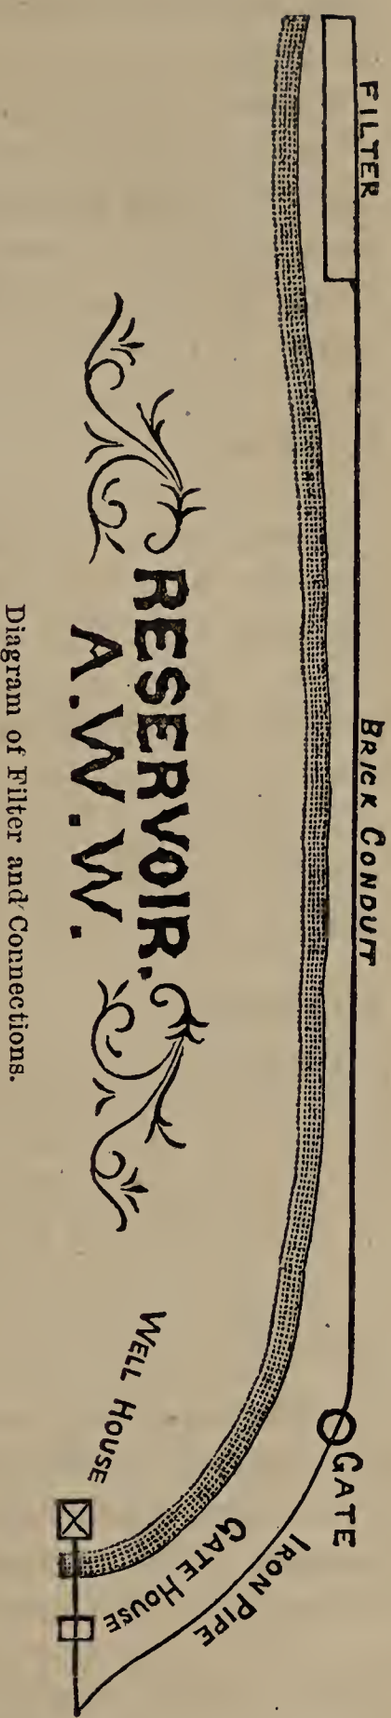

Diagram of Filter and Connections.

occur it would not be difficult to remove the sediment and renew the filter.

The amount of water supplied by the filter is many times greater than what the town is using for domestic purposes. Supplying filtered water for irrigation is an experiment. There are no data from which to ascertain the quantity required. The time and manner of using water for irrigation make it necessary—where there is no reservoir of filtered water, to have a constant supply equal to the greatest amount used at any time, that is, that the filter should give for *each* hour of the twenty-four a quantity equal to the greatest amount used in *any* hour. This the present filter will undoubtedly do for ten months of the year and probably for the other two. If at any time it should fail to do so, an ample supply for the future can be procured easily and for a small outlay, as the conduit leading from the filter is large enough to carry all the water which our present water-shed will supply and the filter is so arranged that its capacity can be increased so as to filter it all. Though the expense of such an increase of the works would have been small the Commissioners did not feel warranted in incurring it till it should be shown to be necessary.

Taxation.

A bill for taxes on all the property which the town of Arlington holds for water purposes within the limits of the town of Lexington having been received in August, the Commissioners applied to the Assessors of Lexington for an abatement of the tax, which said Assessors declined to grant. Application was then made to the County Commissioners for the abatement. This action was approved by the town at the November meeting, and the Water Commissioners were authorized to take all legal proceedings necessary to test the validity or legality of the assessment of the tax. The County Commissioners appointed a hearing in the case for December 23d. At that time they adjourned till the ground should be free from snow, and thus the matter rests at present.

Scrip and Interest.

The amount of Water Scrip issued up to the time of the annual town meeting was $200,000. Since then there has been issued the amount of $10,000 and the Treasurer has sold it at a premium as is shown by his report.

There remains the amount of $18,000 of the appropriations made this year. How soon this will be needed it is impossible to say at present The estimated income to be received from water rates for 1877 is $8,400. This not being sufficient to pay the running expenses and to meet the interest on Water Scrip, an appropriation will be needed to supply the deficiency. The sum required can be better estimated at the time of the next annual town meeting when a recommendation will be made.

Uses for which water is supplied as reported by the Registrar :—

Families supplied,		320
Stores and shops supplied		14
Private stables	"	35
Livery stables	"	2
Horse railroad stable	"	1
Steam railroad depot	"	1
Hand hose	"	132
Hotels	"	2
Churches and societies supplied		5
Town House	"	1
School houses	"	3
Hose houses	"	2
Private fountains	"	3
Irrigation	"	43
Cemetery	"	1
Savings Bank building	"	1
Stone crusher	"	1
Hydrants	"	96

Stock and tools on hand as reported by the Superintendent :—

4 wrenches.
70 feet 4-inch cement lined pipe.
Two 8-inch branches.
1 hydrant jacket.
½ barrel patent cement.
22 picks.
26 shovels.
60 pounds Manilla rope.
140 pounds 4-inch cast iron pipe.
1½ yards rubber cloth.
4 hydrant caps.
7 hydrant valves.
Lot of lumber not measured.

ARLINGTON, Dec. 30, 1876.

B. DELMONT LOCKE, *Treasurer.*

Sections 15 and 16 of Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of the water, namely :—

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$5 00
For each additional faucet to be used by the same family,	2 00
Where a house is occupied by more than one family, and less than four, one faucet only being used for all, for each family,	4 00
Where a house is occupied by four or more families, and but one faucet is used by all, for each family,	3 50
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets, special rates will be made.	
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both; *provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	$10 00
Each additional faucet,	2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OFFICES, WAREHOUSES, ETC., NOT INCLUDING MANUFACTORIES OR WORKSHOPS.

First faucet,	$5 00
When two or more tenants are supplied from the same faucet, each	4 00

Water-closet used by occupants of one tenement only,	$5 00
When used by occupants of more than one tenement, for each tenant,	4 00

For each additional faucet or water-closet, half of above rates will be charged.

Markets, Saloons, Restaurants, Workshops.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water	$5 to $25

Hotels.

For each bed for boarders and lodgers,	$3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

Public Baths.

For one tub in public bath-house,	$10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water closet,	3 00

Stables.

Private Stables.	For the first horse,	$5 00
"	For each additional horse,	4 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, club and boarding stables.	For each horse,	3 00
Car and omnibus stables.	For each horse,	2 00
Truck and cart stables.	For each horse,	2 00

Provided, that in no case shall any stable be charged less than $5.

The rates for stables include water for washing carriages without hose.

Hose.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets (and the use of the same shall be limited to one hour per day), not less than	$3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse power, $6 00

BUILDING PURPOSES.

For each cask of lime or cement, 6 cents.

HYDRANTS.

Hydrants set by the town at the rate of $28.00 each, allowing one hydrant to each 200 inhabitants.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners; and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases, in their judgment, the interests of the town shall require.

AUDITOR'S REPORT.

The undersigned have this day examined the books and accounts of B. DELMONT LOCKE, the Treasurer and Collector, for the year 1876, and find the same to be correctly kept, with vouchers for all the payments, and the balance of cash to be as stated by him.

CHARLES O. GAGE,
ABEL R. PROCTOR,
G. M. MORSE,
} *Auditors.*

ARLINGTON, Feb. 1, 1877.

ANNUAL REPORT

OF THE

Chief Engineer of the Arlington Fire Department,

FOR THE YEAR ENDING DEC. 31, 1876.

Selectmen of Arlington,

GENTLEMEN,—I herewith submit my Third Annual Report, giving a detailed statement of the present condition of the Fire Department, also offering recommendations for immediate and future needs.

Fires and Alarms.

There have been sixteen bell alarms for fire the past year, some of which have been for fires in adjoining towns, to which this Department has responded and rendered valuable assistance.

Loss from fires in Arlington,	$4,375 00
Insurance,	6,500 00

Two fires have occurred, one on Charlestown and one on Henderson Streets, for which no alarms have been sounded, the result of no night-watch and no system of fire-alarm, and I would earnestly recommend that the matter of fire-alarm be considered, and some action taken by the town, tending to the introduction of an efficient system whereby the Department may receive timely notice of the existence of fire, and I will here state that a telegraphic system may be erected on Arlington Avenue, from Park Avenue to Henderson Street, which would cover the most densely settled portion of the town and could at any time be extended, with the necessary boxes and strikers, for $2,000, which in my judgment would save its cost each year. If bells are put up they should be

of sufficient size to be heard from one hose house to the other; but by a telegraphic system you may use the church and school bells. Something should be done to remedy the delay now experienced in sounding an alarm of fire.

Membership.

The Department consists of thirty-six members (three less than last year), comprising a Chief and four Assistant Engineers; two Hose Companies of twelve men each; one Hook and Ladder Company of seven men, the Hook and Ladder Company having been reduced from ten to seven men. The Department so far as membership is concerned is in an excellent condition, being constituted of some of our leading young men, many of whom have seen several years' service in this and other departments, and upon the sounding of an alarm of fire report for duty with commendable promptness.

Hydrants.

At the commencement of the year I conferred with the Water Board with regard to fire hydrants and the care of the same, which duty they have attended to and by their prompt action the hydrants have been kept in good condition, and in case of breakage have been promptly repaired or replaced, and in no case have the hydrants failed to furnish the requisite amount of water the past year. There is no doubt but that the hydrant now in use in this town is superior to any other style of hydrant, and I would earnestly recommend that a larger number be located in order to furnish better facilities for the extinguishment of fires and save the use of long lines of hose.

Department Hose.

The time has arrived when a purchase of Hose is indispensable, the present supply being in the following condition: One thousand feet good; seven hundred poor; five hundred worthless, and I would recommend the purchase of *one thousand feet of new hose*, and from personal investigation I am satisfied that cotton hose, rubber lined, is best adapted to the requirements of this town, as they require less attention, will not mildew, need no oiling, are cheaper and have proved to outwear the best leather hose that can at present be obtained. The town purchased in 1872 one thousand feet of leather hose of a Boston maker, that has proved

good, to which I have referred; about five hundred feet of leather hose of another maker at the same time, that has been a constant bill of expense; in 1873 five hundred feet of plain linen hose that is now nearly worthless, some of which has been condemned. I hope the matter of fire hose will receive your immediate attention.

Department Buildings.

The Engine Houses need some repairs. The house occupied by Hose Three and the Hook and Ladder Truck needs to have the roof and lower floor repaired; new frames in lower windows; some painting should also be done. The house occupied by Hose Two and Hand Engine, is in poor condition. There being no cellar or underpinning, the frost has free access, causing water and gas to freeze, necessitating the replacement of pipes each year, also making it impossible to keep the apparatus in good order, and if the Adams School House is not to be used for school purpose, I would suggest that it would make a good house with which to replace the one now occupied by Hose and Engine and would furnish ample accommodations.

Personal Recognition.

Before closing my report, I would acknowledge the many favors received at the hands of the Selectmen, Water Board and Chief of Police, and for their co-operation they will please accept my sincere thanks. To the Engineers and members of the Arlington Department, I desire to express my obligations for the ready manner in which they have assisted me in discharge of duty, which obligation will ever be remembered with gratitude. To Chief Engineer Raymond of the Cambridge Fire Department, Chief Hopkins of the Somerville Department, Chief Hill of the Medford Department and to the companies in their Departments, my acknowledgments are due for valuable assistance rendered at fires in Arlington the past year.

Respectfully submitted,

ALFRED HOBBS,
Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The Library now enjoys the income of the generous legacy left it by the late Nathan Pratt, Esq. This, with the appropriation annually made by the town, will enable the Trustees hereafter to make valuable additions of books each year. An unusual yet necessary expense was incurred last year. An accurate and most excellent catalogue has been prepared and published. The credit of this work—the difficulty and labor of which few can appreciate—is due mainly to the skill and industry of the librarian, Miss Newton. Its typographical excellence also deserves notice. It is believed that this catalogue will prove satisfactory to all who use the books.

The Trustees hope that the day is not very distant when a good reading room can be added to the Library.

The number of books in the Library is 5,500.

The number given out during the year is 20,557.

The number not returned is 14.

The amount paid to the Town Treasurer for fines, is $69.00.

D. R. Cady,

For the Standing Committee.

Arlington, Jan. 29, 1877.

SCHOOL COMMITTEE'S REPORT.

The School Committee beg leave to report:—

The schools during the year have been carried on with regularity and with a good degree of success. The plan of placing each school under the special care of a sub-committee, which is responsible for its condition, and which reports each month to the board, has been more fully carried out. To the reports of these sub-committees the attention of the town is called for various details in relation to the schools.

The increased number of scholars in the town—an addition of more than sixty being reported last spring—brought two results. It made necessary the division of the Sixth Grade in the Russell building and the employment of another teacher. It also rendered impracticable the carrying out an attempt, by a readjustment of District lines, to dispense with one of the Cutter Schools. No reduction in the number of schools or of teachers has been made, but an addition of one school-room and one teacher.

At the last annual town meeting a reduced appropriation was granted for schools. Your committee endeavored in good faith to carry out the wishes of the town, and at the same time to protect the schools from injury. But they found themselves unable to effect any material reduction of expenses during the first half of the year, because contracts already existing with teachers and janitors did not expire till July. Since that time the rate of expenditure has been diminished and has come within the prescribed limits. Indeed, on the first day of January there was a small unexpended balance of school funds in the hands of the committee.

Some unusual expenses for repairs at the Cotting High School became necessary; and your committee hope that, by laying a new floor in the upper school-room, the vexed problem of how to maintain a comfortable degree of warmth in it, such as the health of the scholars and the efficiency of the school require, has been solved.

The attention of the town is called to the discreditable condition of the grounds at the High School. The building also is poorly adapted to its purposes. The wisdom of expending much money there is at least questionable. May we not hope soon to have a house in which the work of the High School can be done to better advantage, and of whose surroundings we shall not be ashamed?

Your committee are aware of the pressure of the times, and the need of strict economy in personal and municipal expenses. But any retrenchment which would impair the efficiency and lessen the usefulness of our public schools would be a mistaken and disastrous economy. It was never of more importance than now, to employ the best teachers, and to keep the grade up to the highest attainable standard. The very hardness of the times is a new and potent argument for good schools. It makes an education even more valuable, because that education widens the range of possible employment, and multiplies the chances of success, by increasing the ability to do well a larger number of things. It opens new avenues of business before every young man and woman in the town. Then, changed pecuniary circumstances make multitudes feel to-day, that about all they can give their children is a good education.

Let us not take from one child a single facility for lifting up his life to a higher plane, and for becoming something nobler and better than he would otherwise have been.

Let us take from no parent, upon whom the shadows of adversity have fallen, the comfort of knowing that he can at least *educate* his child.

The schools are commended anew to the generous support and fostering care of the town.

D. R. CADY, *Chairman*,
In behalf of the School Committee.

ARLINGTON, Jan. 29, 1877.

Cotting High School.

The sub-committee take pleasure in presenting an encouraging report of the condition of the High School. There are at present fifty-one pupils in its three classes, a number which compares favorably with former years. It is also noticeable that the proportion of boys to girls has increased, there being twenty-five of the former

to twenty-six of the latter. During the past year we lost the valuable services of Mr. Tuttle and Miss Abbott. A change of teachers always occasions some delay and irregularity among classes; but, in this instance, your committee procured at once the best available teachers to fill the vacancies, and the work of the scholars suffered as little interruption as was possible under the circumstances. The school is now ably instructed and well managed by Mr. C. W. Stickney and Miss Mowry, newly appointed, together with Miss Simmons, who has been an efficient and successful teacher here for several years.

The course of study has not been materially changed, and includes those branches which are usually taught in our best English and classical schools. No fixed or arbitrary system of instruction can meet the needs of all pupils, and ours fortunately possesses great flexibility and is easily adapted to the special demands of each class. Therefore, young ladies who are fitting for Wellesley or to become teachers, and young men fitting for Harvard or for a business career, can pursue with equal thoroughness their respective studies, and receive the same valuable assistance from the faculty. The majority, however, prefer to follow the regular course approved by the teachers and the committee.

The standard of scholarship, as shown by careful, written examinations, is high, and is steadily improving. This is due not only to the skill and fidelity of the teachers in the school, but also the effect of our graded system in the subordinate schools. The classification of the various Grammar classes is arranged with reference to the final graduation of pupils from the High School, and each year the Examining Committee has encouraging proof that this system is producing better results and in fewer years, than could have been expected formerly. Those scholars, who have regularly passed through the lower grades, are prepared to appreciate and enjoy the advantages offered them in the advanced classes. Those advantages, however, seem to be often undervalued both by parents and scholars, and it is seriously to be regretted that the graduates from our Grammar Schools, especially the boys, do not continue and complete their studies, which have been earnestly begun. Our young men should be told that the business world can dispense with their premature services for a while. It is an unwise haste which induces them to abandon the most precious years of school life, in order to swell that multitude

who are unfortunately without occupation. We are glad to note some reform in this respect, and we trust that parents will lend their influence in the right direction. We believe that the High School is growing in favor among all who are familiar with the work actually accomplished there by pupils and teachers. Those, who may be disposed to comment unfavorably either upon its methods or its officers, should in justice visit the institution frequently and see the results there attained. When its graduates are able to pass the searching examination of our leading University with distinction, as has been the case, our fellow townsmen may be assured that a high standard of scholarship is both set and attained at the Cotting High School.

A liberal policy in regard to our schools is always in the end the wisest and most economical, and no expenditure of the town shows more gratifying results or better returns both materially and morally than the appropriations made for education. When this sentiment becomes general among us, as we earnestly hope it may, our most promising young people will no longer have to perform their school exercises in a building, which has many of the marks of a Pharos or a barrack, but without the peculiar advantages which belong to each. An enlightened public opinion, however, will in time remedy this evil.

Upon the whole, the sub-committee congratulate you on the satisfactory condition of the High School, and its promise of future usefulness.

Respectfully submitted,

GEORGE W. CUTTER,
For the Sub-Committee.

Russell Grammar School.

(*First, Second and Third Grades.*)

It is a mere matter of form to make a report of these schools, as the parents recognize and appreciate, and the children acknowledge, the thoroughness as teachers and kindness as friends and companions in the school, of those model teachers, Mr. Grover, Miss Hobart and Miss Turner, who have been with us so many years.

In each of these rooms the visitor will see that great care is taken to train the pupil and develop ideas in accordance with the child's individuality, in a liberal manner and not after an exact method and mechanical pattern.

The average attendance has been good. At times the schools have been almost too large for the proper care of the teacher, but at no time has a lack of good management and careful instruction appeared.

It is a matter of congratulation that these teachers still retain their health and are permitted to attend constantly as well as faithfully to the requirements of their respective schools.

The average attendance of the Grammar Schools has been more than ten per cent. greater than that of the preceding year.

CHAS. E. GOODWIN,
For the Sub-Committee.

Russell Grammar School.

(*Fourth, Fifth and Sixth Grades.*)

The schools in these Grades are doing well, and with the exception of the New Division of the Sixth Grade, are under the same teachers as heretofore.

In consequence of the great number of scholars (71) in Miss Warren's room, at the beginning of the fall term, the school was divided, and Mrs. Emma S. Hill was appointed to the new school thus formed.

F. V. B. KERN,
For the Sub-Committee.

Russell Primary School.

In no department of our public schools is more important work undertaken or better results achieved than in this lowest grade. It still continues under the wise and successful management of Misses Schouler, Packard and Fessenden. Each of these teachers has endeavored to develop the young minds in their charge by the exercise of that patience, prudence and perseverance so essential in instructing beginners. The ends which they have reached prove the excellence of their method ; and we hope that the parents of the children entrusted to their guidance may often visit the recitation rooms, and there witness how pleasantly as well as profitably the hours are passed. Respectfully submitted,

GEO. W. CUTTER,
For the Sub-Committee.

Cutter Schools.

These schools continue under the same teachers and all are doing well, excepting the Primary. Unfortunately for this school the teacher has been unable to attend since the summer vacation, on account of sickness. Her place has been filled with substitutes, consequently the school is not up to its usual standard; but with the present teacher the discipline is gradually improving.

It was the committee's intention to discontinue the school in the Schwamb building, but when we came to make provision for the same at the commencement of the fall term the number of children had so increased that we were obliged to give up the project.

The Heights School, under the charge of Miss Snelling, is doing as well as could reasonably be expected after making a change of teachers. The school has increased in numbers very much during the past year and it now ranks favorably with the other schools of the district.

HENRY SWAN,
For Sub-Committee.

East District.

These schools continue with undiminished numbers, under the care of Miss Scanlan and Miss Bowers. Miss Bowers returned to her school at the beginning of the fall term, after a leave of absence for two terms, her place being acceptably filled during the time by Miss Snelling, who seemed well adapted to interest the infant minds under her care. Miss Scanlan seems, by her kind disposition, eminently qualified to train the Primary School.

Both of these teachers complain that they receive but little cooperation from the parents of the district, the visits of the parents to the school being "like angels' visits, few and far between." Parents, encourage the teachers by visiting the schools.

JOHN P. WYMAN,
For the Sub-Committee.

VOTES PASSED BY THE TOWN.

Copies of Votes published in accordance with the following vote, passed at Town Meeting, held March 14, 1876, viz:

Voted, That the Town Clerk be, and he is hereby instructed, to publish with the Annual Reports, the several resolutions and votes, adopted by the town, relating to the appropriation, expenditure and payment of money by town officers.

Vote passed at Town Meeting, held March 2, 1874.

Voted, That all unexpended appropriations, heretofore made, be and they are hereby revoked and cancelled. The Town Treasurer is hereby directed to begin the several accounts with the appropriations made for the current year: and in no case shall he carry forward any unexpended appropriation or balance of appropriation, unless the same shall be re-appropriated for this year; and all appropriations hereafter made shall be applied exclusively to the objects for which they are appropriated.

Vote passed at adjourned Town Meeting, held March 25, 1874.

Voted, That the several town officers and committees shall not in any case exceed the amount appropriated for an object in their expenditures for such object. The Town Treasurer shall not pay out any money from the treasury, unless upon an order for the

same drawn by the proper officers or committees of the town, stating the object for which the demand was incurred, and the fund out of which the order is to be paid, nor unless an appropriation has been made for that particular object, and funds remain to the credit of the account under which the demand was incurred, and on which the order is drawn.

Vote passed at Town Meeting, held March 8, 1875.

Voted, That the several town officers and committees, entrusted with the expenditure of money, in cases where the amount appropriated for any object shall have been expended during the fiscal year, may, during the months of January and February in each year, expend monthly for such object, when necessary, an amount equal to the one-twelfth part of the appropriation made for such object for the preceding year; and the Treasurer is authorized, on the order of the proper officers or committees, to pay such sums as may be necessary, not exceeding said one-twelfth of former appropriation, monthly, out of any unexpended funds in the town treasury, during said months; said sums, so paid, to be temporarily taken from said funds in anticipation of the annual appropriations.

SELECTMEN'S REPORT.

The close of the present financial year, the fourth under the present administration, requires a detailed report of the doings of your Board of Selectmen, for the past twelve months, which is herewith respectfully submitted.

Highways and Bridges.

Appropriation,	$7,500 00
Brick and concrete walks,	500 00
Appropriation Nov. 10th, Vine St.,	850 00
	$8,850 00
Expended,	8,523 13
Balance unexpended,	$326 87

Arlington Avenue.

Outside of the usual repair, to which all of the highways are yearly subject, no work has been done on that portion of the avenue, lying between the foot of the rocks so called, and Alewife Brook. In our report, for year ending Dec. 31, 1876, it was stated through error, that the entire avenue was macadamized to the Lexington line. The statement was incorrect, in place of the words Lexington line, read " foot of the rocks," and you have the progress made in the macadamization of the avenue up to that date. During the present year, we have macadamized two sections,

one commencing at a point near the estate of John Pierce and extending nearly to Park Avenue, the other beginning at a distance from Park Avenue, of about one hundred feet, and extending to Vine Street. We have regravelled a small portion of the avenue, near Bow Street. The sidewalk on the northerly side, from Schouler Court to the estate of Andrew Wellington, has been partially gravelled, and put in good repair. To those of our citizens who have occasion to pass over that portion of the avenue, situate between Academy Street and the junction of the avenue with Lowell Street, numerous depressions may have been noticed in the road-bed, which, aside from rendering the highway uneven for travel, become standing pools of water after every heavy rain. It has been suggested, that these depressions might be remedied by slightly excavating, and refilling with small cracked stone. The outlay would be inexpensive and might save repicking large portions of the avenue.

Park Avenue.

This avenue has been raked and freed from loose stone, five or six times during the season. The concrete gutters, laid one year ago, have given complete satisfaction, and while the first cost may have seemed large, time has proved that their construction was sound economy. We would recommend the building of another gutter on the easterly side, in size and dimensions similar to that on the westerly side. The distance required being about six hundred feet. The stone base is already laid for a portion of the distance, so that the cost of adding the concrete, cannot be excessive. All the roads leading to the summit of the hill, from their rapid rise, are liable to be damaged and gullied after heavy rains. These will eventually require the construction of similar gutters, to keep them in ordinary repair. By making this work extend over several seasons, begin-

ning with those highways receiving the most travel, the entire work could be completed at no distant day.

Appleton Street.

A portion of this street, between Park and Claremont Avenue, for a distance of two hundred feet, has been regravelled —the road-bed crowned, and gutter repaired. The wash on this street, from its steep grade to Park Avenue, demands a new concrete gutter on the southerly side.

Eastern Avenue.

We have regravelled some three hundred feet of this avenue during the year. The road-bed is in good condition. The travel over this highway is so infrequent, as to warrant but small outlay on the part of the town, at present, either by way of extensive repairs on the road-bed, or in the construction of sidewalks.

Highland Avenue.

The gutters on either side have been cleared, and the road freed from loose stone. The bank wall on the right hand side, built at the time of the road's construction, has partially fallen and will require to be repaired early in the season. The brook crossing the road at this point, when overflowed, causes the water to stand at the base of the wall, and to a limited extent has already undermined it.

Vine Street.

The alterations in the lines of Vine Street, as ordered by the County Commissioners and for which an additional appropriation was made at the last town meeting, have been completed. The openness of the season was most favor-

able to the completion of the road, besides affording labor to many, whom otherwise the town would have been obliged to assist. No money has been raised by town note for the alterations on this street; the entire cost having been drawn from excess and deficiency account.

Mill Street.

We have constructed a sidewalk, for a distance of about two hundred feet, on the southerly side. The road-bed is in good condition, and will require no further outlay for the present.

Academy Street.

It will be remembered, that the acceptance by the town of the upper portion of this street, situate between Maple Street and its present terminus, necessitated some immediate action on the part of the Board, by way of removing the outcropping ledge, near the residence of Mrs. Smith. The acceptance of this section, thus making the same a public highway, rendered the town liable for all damage which might result from its defective condition. Early in the season, we entered upon the work of levelling the knoll by blasting the ledge. The cut, at the point of the ledge, is about five feet. The blast material, thus removed, was made use of in filling the road-bed, at the slope of the hill, raising the same some two and one-half feet. The alteration in the street, effected not only the removal of the ledge, a very serious incumbrance, but also made the road of easier grade than heretofore. The cut, thus made, damaged to a slight extent the estate of Mrs. Smith, which claim your Board have amicably adjusted. The street has been gravelled from Maple Street to Gray estate and is in excellent condition.

Charlestown Street.

The grade of Charlestown Street, at its junction with the main avenue, has been lowered one foot, making a very decided improvement. On the easterly side, we have constructed a concrete sidewalk, thus affording a continuous walk to the centre of the town.

Mystic Street.

We have rebuilt the culvert crossing the road, near the Winchester line. The old culvert was of size insufficient to carry the water, often causing an overflow sufficient to wash the road-bed. The present drainage, under the highway, has been much enlarged, and covered with a brick arch, so substantially built as to require, we believe, no expenditure, by way of repair, for many years. The street has been freed of loose stone, gutters cleared and road-bed generally repaired.

Medford Street.

Excepting Pleasant Street, there is no thoroughfare of importance, within the town limits, requiring so complete overhauling as this street, from the avenue to Medford line. The road-bed is rough, with frequent depressions, almost its entire length. The street requires to be repicked, coated with blue gravel and crowned, and sections where the grade is steep protected by concrete gutters. Your Board would have undertaken the needed improvements on this highway the present year, had it not been for the pressure of other work, but most of all, from a fear lest the appropriation for highways would not warrant so extensive repairs as seemed to be required.

Winter Street.

Complaint has been frequently made of the defective condition of this street, especially of that portion situate near

its junction with the main avenue. While as a rule, we would be extremely cautious in our advocacy for the removal of shade trees, from any section of the town, still in the case at hand, a judicious thinning of some of the trees is absolutely essential, to render the street acceptable for public travel. These trees were originally set out, in close proximity to each other, and have rendered good service, until in these later years, their rapid growth and increased foliage make so constant a shade, that the road-bed, scarcely if ever, becomes dry. If for a short distance, on the easterly side, every other tree were removed, the street raised at its outlet on the main avenue and the road-bed repicked and lightly covered with blue gravel, we think the change would not only be satisfactory to the abutters, but those of the citizens having occasion to use the street.

Lake Street.

The most expensive work undertaken and completed during the season, was the macadamization of that portion of Lake Street, commencing at the track near the ice-houses, at the outlet of the pond, and extending easterly a distance of sixteen hundred feet. Reducing the street to grade, required the lowering of the shade trees on the westerly side. These trees were planted at the expense of the abutters, two years ago, are young and thrifty, and with an occasional exception, will survive the change. A gutter, not concreted, has been made on the northerly side sufficient for the present drainage of the road. The thoroughness with which the work on this street has been done, would almost warrant the assertion, that it will last for all time. Certain it is, that this portion will require no further expenditure for a long time. The road-bed is covered with three inches of crushed stone, and over all a generous coating of blue gravel. The street is now macadamized from the main avenue to the ice track, excepting nearly three

hundred feet, from the railroad crossing to the brow of the hill, near the residence of Josiah Crosby. The incessant heavy teaming over this road, of ice and manure, has very seriously damaged this portion, which should be repaired with crushed stone another year.

Alewife Brook.

At the annual March meeting, under an Article in the warrant: "To see what action the town would take, relative to opening a fishway to Spy Pond," the town voted to refer the whole matter of said Article, to the Selectmen.

The recent connection of Little and Spy Ponds by the City of Cambridge, together with the construction of tidal gates on Charlestown Street, had so affected the water of the brook, both as regards its quantity and purity, as virtually to destroy the fishway, which has existed from time immemorial, from Mystic River to Spy Pond. Your Board notified the State Fish Commissioners of the condition of the brook, and petitioned for a hearing of all parties in interest. A hearing was held June 11, 1877, at which were present the Chairman of the Board of Commissioners, Mayors of Somerville and Cambridge and Selectmen of Medford. The whole question, so far as it related to the opening of a fishway, was discussed, and at the conclusion of the hearing, Mr. Brackett acting for the Fish Commissioners, decided to notify the City of Cambridge, to proceed forthwith to construct a fishway, conforming in all respects to the requirements of the law. In accordance with that decision, the City of Cambridge has caused to be built a fishway, satisfactory to the Commissioners, in length forty feet, width six feet, with a fall of one foot in ten. The water enters a sliding gate, then striking an opposing surface, is thrown back almost to the point of starting, then passing on to a second obstruction, and again thrown back, effecting a retardation so constant, that its velocity at the

outlet is no greater than at the point of entrance. This fishway, after its completion, remained closed, so that during the months of August and September,—a period of the year when the young alewives return to the sea,—the fish following the course of the brook to the river, and barred at the tidal gates, both by a closed fishway and the accumulated sewage, died by thousands along the banks. Your Board, for the second time, petitioned the Fish Commissioners for a hearing, relative to the approval of the fishway, and the maintenance of the same by the City of Cambridge, open and unobstructed, during those months required by law. Mr. Brackett, in behalf of his associates, accepted the fishway and gave assurance to the Board, that another season proper legal notices would be served, fixing the times when the fishway shall be opened for the passage of fish to the ponds, and their subsequent return. Three sewers now empty their contents into this brook, and serve to drain a large portion of northern Cambridge. As the population in this district increases, the sewage will increase, and the time when the stench from this present system of drainage shall become absolutely unbearable, and the increased death-rate of those resident in the vicinity shall be only too apparent, cannot be far distant. If the City of Cambridge persists in finding an outlet for her sewage by a system of drainage, following the course of the brook, the citizens of Arlington will demand the construction of a sewer, entirely independent of the brook, so that its waters shall flow pure and unobstructed, as in the memory of our oldest residents. Certain it is, that Arlington will, and ought to look with jealous eye on this encroachment on the part of Cambridge, affecting as it does the health and welfare of our citizens.

Concrete.

We have laid upwards of five hundred yards of concrete in yard of Cutter School, besides doing quite extensive

work around the Russell School, and the sidewalk fronting the same.

Street crossings have been laid on Main Avenue, near residence of Geo. Tufts and Wm. L. Clark, also a crossing on Charlestown Street, near the Fowle estate. The cost of all the appliances, necessary to the work of putting down concrete, is but nominal in comparison with the saving effected. Every year we are reminded of the large amount saved in this way, over the old system of hiring the work done by outside parties. In the ordinary use of concrete, for sidewalks and paths, free from heavy travel, we estimate the saving at least thirty cents per yard. In the matter of street crossings, requiring a heavy base of stone, for which the town formerly paid one dollar per yard, we estimate the cost of construction at sixty cents per yard.

Coal.

There was no special vote passed at the annual meeting, relative to the purchase of coal by contract for town purposes.

Regarding, however, the usage of former years as the will of the town, the Board acting with the School Committee, issued the usual letter inviting proposals from the dealers, for the town's supply. The lowest bid, of $4.58 per ton, was received from Messrs. J. A. Wellington & Co., and to them the contract was awarded.

Cemeteries.

Appropriation,	$400 00
Expended,	365 94
Balance unexpended,	$34 06

The care of both cemeteries has been under the charge

of Mr. Hartwell. Foliage plants and flowers we set out in the spring, in the grounds of the new cemetery, at a small expense.

The Board have adopted this plan, of adornment of the public beds, to a limited extent, for the past three years, and believe that considering the small outgo required, the idea is a good one, and we most heartily recommend its future continuance to our successors in office.

Watering Streets.

In accordance with the custom of the last few years, the Board caused a subscription paper to be circulated, early in the season, soliciting a portion of the expense from residents on the avenue and Pleasant Street, on the line of the proposed watering. The amount thus subscribed exceeded two hundred dollars. We have used our own carts and horses for the work, and have watered the avenue, from Linwood Street to the Baptist Church, and Pleasant Street, from the centre to residence of Geo. Hill.

Licenses.

By vote of a majority of the Board, ten licenses, for the sale of intoxicating liquors, have been issued the present year, inclusive of two licenses granted to each of the druggists in town. There have been seven arrests for illegal sale and violation of the conditions of the licenses granted. Licenses of the first, third and fourth classes were issued. Under the first class, "allowing the sale of any kind of intoxicant, to be drunk on the premises," four licenses were granted at one hundred and fifty dollars each. Under the third class, "allowing the sale of malt liquors and cider, to be drunk on the premises," four licenses were issued at seventy-five dollars each. Under the fourth class (druggists), "allowing the sale of any kind of liquor, not to

be drunk on the premises," two licenses were granted. The total amount received from all licenses issued, stands as follows:

First class,	4 licenses at $150,	$600 00	
Second class,	4 " at 75,	300 00	
Fourth class,	2 " at 50,	100 00	
Total,		$1,000 00	

Police.

From the annual report of John H. Hartwell, Chief of Police, to the Selectmen, the following statistical information may be of interest.

Whole number of arrests for the year ending Dec. 31, 1877,	116	
Males,	104	
Females,	12	
		116
Assault and battery,	28	
Drunkenness,	24	
Disturbing the peace,	21	
Malicious mischief,	9	
Illegal keeping and sale of liquor,	7	
All other causes,	27	
		116
Increase of arrests over last year,	37	

At the annual meeting in March, two thousand dollars were appropriated for this department. The Selectmen re-elected Mr. Hartwell as Chief, and appointed P. J. Shean and Garrett Barry as assistants. With this increased force one officer remained in charge of the centre day and night,

while to the other two was delegated the care of the upper and lower sections of the town. Considering the extent of territory thus allotted to each man, it is next to impossible to more than partially guard the districts.

The Chief compliments his assistants for their willing and efficient aid during the year. The same appropriation is recommended for another year. No expense has been incurred by way of repairs at the Station-house, nor will any outlay be required in the spring, other than the usual brightening and cleansing with whitewash of walls and cells.

Tramps.

The number of vagrants lodged and fed by the town the present year over the last season shows a serious increase. The law is yet to be enacted which, by the severity of its penalties, shall free our cities and towns from this dreaded nuisance. The total number provided for for the year ending Dec. 31, 1876, was 805; the whole number for the present year, as shown by the report of the Chief of Police, is 1,413, showing an increase of 608 over the number cared for last year. The Board adopted, early in the season, the plan of referring all tramps requesting permits to the Chief of Police. This method brings every applicant under his immediate notice, and tends to diminish too frequent applications from the same party. All tramps applying for permits before nine o'clock in the evening are sent to the Almshouse; all others are put up at the Station-house. During certain months the tramps have been compelled to work until eleven o'clock on the highway, as allowed by law; while, during other portions of the year, when it was more difficult to utilize their labors, they have been allowed to depart early in the morning, before breakfast, or remain and work out their meals, as they should elect. In nearly every instance they prefer to start on their tramps unfed, than to perform this enforced labor.

The statistics for the year certainly show, without question, that none of the requirements as yet demanded from this wandering class in lieu of food and lodging are sufficient to deter them from soliciting public support.

The following exhibit shows the number provided for each month:

January,	146
February,	205
March,	268
April,	171
May,	110
June,	43
July,	31
August,	32
September,	46
October,	109
November,	105
December,	147
Total for the year,	1,413

Outside Poor.

Appropriation,	$2,000 00
Expended,	1,644 26
Balance unexpended,	$355 74

To your Overseers of the Poor no more difficult problem has presented itself than the wise and economic distribution of the funds placed at our disposal for the partial maintenance of the deserving poor. The labors attendant on the general care and management of the town's affairs are as nothing compared with the time required, both in the collection of facts relative to the pressing needs of the applicant

and the bestowal of aid with a liberal and at the same time judicious hand. The men employed on the highways, so far as circumstances and the character of the work will permit, have been those with families in needy condition. The pay during most of the season was $1.50 for the day men. At the close of the year this was reduced to $1.00 per diem. It has been intimated to us frequently that the wages thus allowed were in excess of those paid elsewhere, and that the town could readily employ men without number at $1.25, or even at $1.00, per diem. We have by no means been insensible to these suggestions on the part of our citizens, and in defence of our action in the matter, would avail ourselves of this opportunity to say that the subject has repeatedly and again been introduced and discussed at the sessions of the Board; and the conclusion arrived at was this: That in view of the continued wide-spread depression in all industrial interests, we found ourselves in this dilemma,— to either grant aid outright to certain resident families, or, by offering work at a fair compensation, these families, with extreme prudence, would become self-sustaining and not be a direct charge on the town. So that the whole subject in a nutshell is this: Shall we or shall we not, so far as possible, receive a return in labor for money expended for the resident poor? It will be remembered, also, that the force employed by the town are, for the most part, day men and that they are frequently cut short from their pay by severity of the weather. For the ten months ending Nov. 1, 1877, the average pay received per man was $215, or $21.50 per month, an amount not more than sufficient for the proper maintenance of themselves and families. It is a noticeable fact in the distribution of the funds in this department that, as a rule, the first requirement for aid from a public source touches to the quick the pride and feelings of the applicant, while for the second and third time the soliciting party becomes more emboldened, until finally, in some cases, the previous modest request degenerates into unwar-

rantable demands and effrontery. When to give and when to withhold are the serious and perplexing questions; when to throw wide open the doors of your Almshouse and when to render just sufficient aid to tide the applicant over a dull working-season, preserve his self-respect and enable him to maintain his family without the notoriety which shadows a pauper's home, is the problem of too frequent recurrence.

Street Lamps.

Appropriation,	$1,500 00
Expended,	1,442 82
Balance unexpended,	$57 18

Town House.

Appropriation,	$400 00	
Received from rents,	712 50	
		$1,112 50
Expended,		760 25
Balance unexpended,		$352 25

Almshouse.

Appropriation,	$1,600 00
Expended,	1,472 14
Balance unexpended,	$127 86

Counsel Fees.

Appropriation,	$500 00	
Appropriation, Nov. 10,	300 00	
		$800 00
Expended,		733 40
Balance unexpended,		$66 60

The Town Treasurer was authorized to borrow $300, the amount of the second appropriation, on town note; but the funds at his command arising from unexpended balances were amply sufficient to liquidate all bills under this head, and the same have been paid and the amounts charged to excess and deficiency account.

Fire Department.

Appropriation,	$3,800 00
Expended,	3,792 59
Balance unexpended,	$7 41

The report of the Chief Engineer, herewith submitted, affords a detailed account of the condition of this Department, to which reference may be had.

Incidentals.

Appropriation,	$1,600 00
Auctioneer and billiard licenses, and court fees,	15 60
	$1,615 60
Expended,	1,276 71
Balance unexpended,	$338 89

State Aid.

Balance unexpended,	$444 63

Repair of Hearse.

Appropriation,	$150 00
Expended,	123 00
Balance unexpended,	$27 00

Salaries of Town Officers.

Appropriation,	$4,100 00
Expended,	4,100 00

Monuments.

Appropriation,	$500 00

Not used.

Interest on Water Debt.

Appropriation,	$7,000 00
Expended,	7,000 00

Town Documents.

The Board have caused a cabinet to be placed in the Clerk's room, for the reception of the public documents and reports yearly received. The books are protected by glass sliding-doors, and easy of access to those desiring them for reading or reference.

Town Notes.

At the annual meeting it was voted to borrow on town notes, the sum of eight thousand dollars, being one-half of the town debt maturing the present year. At a subsequent meeting the town voted to borrow in addition to the above, the sum of eight thousand dollars, the proceeds to be used for the erection of a school-house on Park Avenue. It will be seen by a glance at the schedule of town indebtedness, in the annual report, that all demands against the town, payable at a future date, and not on demand, with a single exception, are drawing interest at the rate of seven per cent. per annum. It would have been a fortunate occurrence for the town, had this entire seven per cent. debt matured within the last two years; the case of the money market having been such that our whole indebtedness could have been funded at a rate of interest not exceeding five per centum per annum. This one item of reduced interest would effect an annual saving of more than twenty-four hundred dollars. Your Board availing themselves of the low rate of interest, caused to be printed town notes with sufficient coupons attached to effect a time loan for twenty

years, with blank spaces for writing in the amounts, thus enabling the Treasurer to borrow any sum for any length of time, not exceeding twenty years, and at any agreed rate of interest. These coupons are made payable at a Boston bank, the same as the water scrip issued by the town. Attached to each note is the attestation of the Town Clerk, giving the date of issue of the town warrant, the time of holding the meeting, a copy of the article in the warrant, together with the special vote of the town, authorizing the loan. These notes are more desirable to investors than the old way of giving a written note, which requires the holder to reproduce the same semi-annually for indorsement of interest; while they are strictly town notes they possess all the merits of a town or municipal bond, affording the holder the same facility for collection of interest through any bank. Bids were solicited the latter part of April, from the leading bankers and brokers, for the purchase of eight thousand dollars of these notes, of one thousand dollars each, dated May 1, 1877, and payable in twenty years from date with interest semi-annually, at the rate of five per centum per annum. At the same time were also offered five thousand dollars of water scrip, bearing interest at six per cent. The highest bid received was from Messrs. Charles A. Sweet & Co., and to that firm were awarded the notes and bonds at prices as follows:

$8,000 00 town notes May 1, 1877, twenty years, five per cent.	$101 65
$5,000 00 town bonds (water), six per cent,	108 25

The loan for building Park Avenue school-house, was offered the latter part of October, at a time when five per cent. loans were looked upon with less favor by capitalists, and the outlook of the market seemed tending towards a higher rate of interest. The time of these notes was cut

down to fifteen years from Nov. 1, 1877, and bids solicited as before. To Messrs. Brewster, Basset & Co., the notes were awarded at the following rate:

$8,000 00 town notes Nov. 1, 1877, 15 years, five per cent. interest,	$100 67

Town Debt.

The floating debt of the town is the same as last year. Of the sixteen thousand two hundred dollars which matured the present year, eight thousand two hundred dollars were raised by taxation, and the balance borrowed, as before stated, on town notes, for a term of years. The eight thousand dollars borrowed for Park Avenue school-house was offset by the amount liquidated this year, so that in round numbers our floating debt is the same. During the coming year one note of five thousand dollars matures, which we recommend the town to make provision for, in the annual appropriation.

Lawsuits.

Excepting the suits instituted by the mill owners and others, arising from the introduction of water, which by express vote of the town, are under the management of the Water Commissioners, there are no lawsuits pending against the town. During the summer, a suit was brought to recover $290, by the City of Cambridge, for the support of one Harrington, a pauper, alleged to have her residence in Arlington. The Board offered to settle the case — without recourse to the Courts — by the payment of $100, which Cambridge refused. The case was argued by counsel for both parties, on an agreed statement of facts, and to Cambridge was awarded the sum of $34.62. Whether

this case will be carried to the Supreme Court, for final settlement, remains with the officials of that city.

Conclusion.

With this report, our official administration of the affairs of the town virtually ceases. The remaining two months prior to the election of our successors, cover a portion of the year in which our labors as Surveyors of Highways are necessarily light, nor can our other duties, excepting as Overseers of the Poor, be very arduous. Four years ago, we received at your hands our election as Selectmen of the town, and for four successive years our ranks have remained unbroken, by the re-election of all its members. We assumed our responsibilities at a time when ill-feeling had been engendered among the citizens, from grievances both fancied and real, lawsuits had been commenced, and were in process of litigation, and your town fast acquiring an unenviable notoriety in the courts. To-day, in this our last official report as a Board, we relinquish the burdens of office, with the record of a single pauper suit for the year, with no new suits commenced or threatened, and with a financial sheet showing no expenditure during the year in excess of your appropriations.

We leave behind no legacy of unfinished business, but a clean record for our successors in office, and invoke for them the same courtesy and kindly consideration which the citizens have ever accorded to us. If during the last four years, which cover a period of business depression, more trying to every industrial interest than any hitherto known, your town has made no rapid strides forward, may we not justly pride ourselves, that she has at least held her own and has suffered no detriment at our hands?

Respectfully submitted,

JOHN SCHOULER,
JAMES DURGIN,
WILLIAM G. PECK,
Selectmen Town of Arlington.

JOHN P. WYMAN,
HENRY SWAN,
B. DELMONT LOCKE,
Trustees of Pratt Fund.

ARLINGTON, Dec. 29, 1877.

REPORT OF WATER COMMISSIONERS.

In compliance with the provisions of law we present our annual report for 1877. The Treasurer's report, which is herewith submitted, exhibits in detail the receipts and expenditures for the year. It will be seen that the water-takers have increased and that the income from water rates is $380.99 more than that of the preceding year. The running expenses have been large from various causes, prominent among which are the enlarging of the filter to provide water for irrigation and the lowering of the street mains, to keep them out of the way of the frost, in those places in which the grade of the street has been lowered. The latter cause will be a constantly recurring one until there is an established grade for our streets and the water-pipes are adjusted with reference to that grade.

After the annual town meeting, we met in accordance with the Rules, and organized by the choice of R. L. Hodgdon, as President, and B. D. Locke, as Clerk and Registrar. Sylvester Stickney was appointed Superintendent.

Extension of Water Mains.

An appropriation of $1,200 was made "to lay pipes in any places in which the income will be not less than six per cent. on the outlay." Four-inch cast-iron pipes have been laid in Fiske Avenue, at a cost of $322.85, the income from

which is $26 per annum. The pipe in Dudley Street has been extended at a cost of $72.74 and the income from the extension is $5. It is desirable that an appropriation be made, large enough to allow the Water Commissioners to lay pipes wherever needed, on such conditions as the town may prescribe.

Fencing.

No new fences have been called for during the year. The boundaries of all the land, owned by the town for water purposes, have been determined by a surveyor, and stone posts have been set at all points at which they were needed at a cost of $99.69, leaving a balance of $110.35 of the Fence appropriation unexpended.

Brown's Brook and Great Meadows.

Brown's brook has been turned into Slocum's pond, through a circular brick conduit 4 inches thick and 3 feet in diameter, with a granite abutment at each end. The expense of this work has been $3,679.39. The Great Meadows have been dammed at their outlet, and the channel at their northerly side has been deepened. Through this channel, the water from the Great Meadows, and, in a low stage of the water, that from Brown's brook, can be turned into the reservoir whenever needed, so as to keep it full during the whole year, provided too much water is not lost by leakage from the reservoir dam, which was originally constructed so imperfectly as to allow the constant escape of a large amount of water through and under it. The expense at the Great Meadows, which we were authorized to pay from the appropriation for Brown's brook, has been $362.24. A small additional outlay may be needed to perfect this work, but much less than the appropriation already made, will be required.

Unsettled Claims.

There are no unsettled claims except those for which suits are pending. No new suits have been brought during the year, so that we have only to report the present position of those existing a year ago. Timothy Eaton's case came before Commissioners appointed by the Superior Court, in September. In the midst of the hearing, Mr. Eaton's counsel abruptly left the case and the room. The Commissioners adjourned, and they are now waiting for Mr. Eaton to get ready to present his case. The Fiske heirs presented their case to Commissioners, last May. Their claim was, according to the testimony of their witnesses, from $2,500 to $3,000. The Commissioners, after a full and patient hearing, awarded $350. This award has not yet been reported to the Court. In this case we had previously offered $300, in settlement, which the claimants refused to accept. The case of Spaulding against the town, is still pending, but will probably be tried this winter. No change has taken place in the case of Reed against the town. We have been ready for trial, but it has been postponed from time to time, at the request of the plaintiff's counsel. The Commissioners who heard the mill cases in December, 1875, reported their award to the Superior Court at the June term, 1877. The award was accepted by the Court, in all but three of the cases. In these the award was conditional, and was referred by the Court, back to the same Commissioners, who subsequently made an unconditional award, which was accepted by the Court. The awards in these cases amount in the aggregate to $82,100, with interest thereon from June 19, 1873. Considering this estimate of damages excessive, we have claimed a trial by jury, and the cases are now awaiting trial in the Superior Court. We have received propositions for settlement, from several of the mill owners, but none which we were willing to accept or which we thought we

should be justified in accepting.* While we are very desirous that the town should avoid the expense and trouble of further litigation, we believe that, unless better terms can be made than any yet proposed, the interests of the town will be served by contesting these cases. Should any of the suits be decided or settled during the coming year, an appropriation will be needed. We recommend an appropriation of such sum as the town may see fit in anticipation of such need.

Filtering.

Last year in our report, we said, "The amount of water supplied by the filter is many times greater than what the town is using for domestic purposes. Supplying filtered water for irrigation is an experiment. There are no data from which to ascertain the quantity required." Observations made this year have given some data. The daily consumption of water per individual is, in country populations, from 30 to 40 gallons; in mauufacturing places and large cities, from 60 to 70 gallons. It was found this year that, at the highest point of irrigation, water was drawn at the rate of nearly or quite a million of gallons a day, or more than 500 gallons a day for each inhabitant using water. The filtering gallery, which would supply, when the reservoir was full, 1,400,000 gallons in twenty-four hours, or 700,000 gallons in a day, of course, could not meet this draught. When water was drawn directly from the reservoir to supply the deficiency its quality showed more clearly than ever before the necessity of filtering. In attempting to increase the capacity of the filter we met an unforeseen difficulty; in the formation of the soil at the reservoir, blue gravel and mud being found at most unexpected points. But we think that we have overcome all obstacles encountered, and have secured an adequate supply of water in the following way.

*Since the date of this report the suit of Oliver Warner *et al's.* vs. the Town, has been settled by the payment of $4.000, for damages, interest, and costs of court.
The Treasurer has sold Water Scrip at 110.03 to make this payment. In this case the award was $4,500; interest to time of settlement $1,237.50; commissioners' fee $500.

On the outer edge of the flat, opposite the filter, there has been built a supplementary filtering gallery 150 feet long, covered by a brick arch of 4 feet span, each end of which is connected with the filter by drain-pipe laid with open joints. This is a novel thing in filtering and may need some modification. If it continues to work, as it promises, and the reservoir can be kept full, we shall have an abundant supply for a 12-inch pipe.

Taxes, Interest and Scrip.

The petition for the abatement of the tax assessed by Lexington on our Water Works was dismissed by the County Commissioners without a hearing on its merits. No further action on the subject has yet been taken.

The amount of Water Scrip issued during the year is $5,000, making the whole amount issued up to the present time $215,000. If the income from water rates for 1878 be the same as for 1877,—and it will not probably vary materially from that,—and if no more scrip is issued, an appropriation of the same amount as was made last spring for interest will be needed the next year. If more claims are settled and more scrip issued, there will be needed an additional sum sufficient to meet the interest on the new scrip.

Uses for which water is supplied as reported by the Registrar :—

Families	supplied,	332

B. DELMONT LOCKE, *Treasurer.*

Sections 15 and 16 of Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely :—

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$5 00
For each additional faucet to be used by the same family,	2 00
Where a house is occupied by more than one family, and less than four, one faucet only being used for all, for each family,	4 00
Where a house is occupied by four or more families, and but one faucet is used by all, for each family,	3 50
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets, special rates will be made.	
Where bath-tubs or water-closets are used by more than one family, for each family;	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both; *provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

Boarding Houses.

For the first faucet,	$10 00
Each additional faucet,	2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

Stores, Offices, Warehouses, etc., not Including Manufactories or Workshops.

First faucet,	$5 00
When two or more tenants are supplied from the same faucet, each,	4 00
Water-closet used by occupants of one tenement only,	5 00
When used by occupants of more than one tenement, for each tenant,	4 00

For each additional faucet or water-closet, half of above rates will be charged.

Markets, Saloons, Restaurants, Workshops.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$5 to $25

Hotels.

For each bed for boarders and lodgers,	$3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

Public Baths.

For one tub in public bath-house,	10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

Stables.

Private Stables.	For the first horse,	$5 00
"	For each additional horse,	4 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, club and boarding stables.	For each horse,	3 00
Car and omnibus stables.	For each horse,	2 00
Truck and cart stables.	For each horse,	2 00

Provided, that in no case shall any stable be charged less than $5.

The rates for stables include water for washing carriages without hose.

Hose.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets (and the use of the same shall be limited to one hour per day), not less than 3 00

Steam Boilers.

For each boiler in use not over twelve hours a day, for each horse power, 6 00

Building Purposes.

For each cask of lime or cement, 6 cents.

Hydrants.

Hydrants set by the town at the rate of $28.00 each, allowing one hydrant to each 200 inhabitants.

Sect. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners; and the rates fixed in

the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases, in their judgment, the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. DELMONT LOCKE, Treasurer and Collector, for the year 1877, and find the same correct, with vouchers for all the payments, and the balance of cash to be as stated by him.

ABEL R. PROCTOR,
WM. T. FOSTER, } *Auditors.*

ARLINGTON, Jan. 28, 1878.

ANNUAL REPORT

OF THE

Chief Engineer of the Arlington Fire Department,

FOR THE YEAR ENDING DEC. 31, 1877.

Selectmen of Arlington,

GENTLEMEN,—I am pleased to report this Department in a much improved condition, both in membership and apparatus, and hope to see that continuation of encouragement on the part of the citizens which has done so much toward placing your Fire Department in its present efficient condition. I do not propose to offer recommendations, leaving that privilege to my successor.

I would call your attention to the increasing risk from fire, caused by heavy insurance, defective construction of buildings and many other causes I might mention, which call for a liberal outlay for protection against serious conflagrations.

There have been fifteen bell alarms for fires in town, to which the Department has responded, beside requests from citizens for service of hose to subdue small fires where the whole Department was not required.

Loss from fires,	$26,214
Insurance,	29,400

I would request an appropriation of twenty-five hundred dollars for the current expenses of this Department the ensuing year.

You have at present eighteen hundred feet of good hose; also about one thousand feet which is very poor, some of which has been condemned. There have been purchased the past year eight hundred and fifty feet of cotton rubber-lined hose, with the Morse-patent coupling which I think will give perfect satisfaction.

I would again call your attention to the house occupied by Hose Two and Engine, and hope the town will see fit to make an appropriation sufficient to erect a comfortable building, one in which the apparatus may receive proper care. I would also state that a feeling exists in this section of the town that their interests are secondary, and that the majority think the present structure good enough; to such as think so, I respectfully request an inspection of the premises.

There have been but two serious fires the past year, both of which were well covered by insurance.

There have been several small fires, but by the prompt arrival of the Department they were extinguished before any serious loss was sustained.

Allow me once more to thank you for your liberality. Also to my associates on the Board of Engineers and members of the Department, my thanks are due for their generous support.

Respectfully submitted,

ALFRED HOBBS,
Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The Library has remained under the care of the same Librarian, Miss L. J. Newton, who has performed her duties faithfully and carefully. No extended report nor recommendations seem needed at the present time, as a committee was appointed at the Annual Town Meeting to report rules for the government of the Library. That committee will, undoubtedly, consider all matters connected with the Library, and report on them, at the next March meeting.

Attention is called to the following statistics as showing the great and increasing demand there is for books : —

Number of volumes in the Library, 5,826.

Number given out during 1877, 21,206.

Number not returned, 7.

Amount of fines paid Town Treasurer, $93.00.

All of which is respectfully submitted,

R. L. Hodgdon,

Chairman of Standing Committee.

Arlington, Dec. 31, 1877.

SCHOOL COMMITTEE'S REPORT.

The School Committee submit their Annual Report: —

The schools, for several years, have been conducted on the same basis, in their classification and methods of instruction. The change in their condition, from year to year, has been so immaterial, that the report which the law requires to be rendered annually, must necessarily have the aspect of repetition. The character of our schools is the result of continued and thoughtful labor and attention, and it has recently passed under the rigid scrutiny of the town. The committee understand that the judgment of their fellow townsmen is favorable to the existing system, and it has therefore been their study to strengthen the advantages which it is designed to secure.

The graded classification is still preserved. In the Russell School this mode is practically complete. In the Cutter Schools the nearest approximation to thorough gradation, consistent with the school conveniences, and the number and character of the pupils, has this year been made. The grades now consist of the High School, the Russell School, with its six grammar and three primary classes, with which last the East Schools are parallel, and the Cutter School with similar grammar and primary grades, including the School at the Heights as tributary. Thus all the schools are arranged in two groups with the High School at the head. The system certainly commends itself for methodical

disposition, and if it secures the object of thorough and progressive training and instruction, it accomplishes the purposes of its establishment.

This order of schools is by no means of sudden production, for it is the fulfilment of a plan initiated long ago, and brought by cautious and gradual advance to its completion. It has undergone its trial during its growth, and has afforded many signs of success. Its chief merit consists in the harmony and interdependence of all the schools. Each is better for its connection with the others. Each must discharge its duty so that there shall be no jar nor interruption in the aggregate. It must be seen that studies can be arranged in due succession from the beginning to the end of school life, and that therefore there must be the opportunity and promise of thorough instruction.

The committee are ready to admit that there are difficulties incident to the system which in some measure interfere with its perfect operation. The theory on which it rests, requires that all children shall pass through the several grades, from the lowest to the highest; but this can be possible only where children are equal in ability, diligence and condition of life. Practically a different state of things exists, and it is found that only a portion of the pupils remain in school long enough to reach the higher grades. The lower grades are full, sometimes crowded, while the higher are relatively sparse in numbers. The inefficient, and what is a more serious consideration, possibly the poor, get the schooling of the lower grades, leave school temporarily, fall out of line, and if desirous of returning, find no place except their former grade, which in body at least, they have greatly outgrown. Rather than join a class of their juniors, they abandon school altogether. Such cases exist, but not in sufficient number to warrant the opening of a special school for their benefit. Evening schools have been tried, but have not proved successful. The only course to be suggested is to meet each case as it is presented, and

when a pupil desires to resume school, to place him among scholars of his own age, where he may receive such partial instruction as can be afforded.

Another difficulty reveals itself in the promotion of pupils from one grade to another. The graded system includes the classification of studies. Each grade conprises a single class, all the members of which pursue the studies assigned to it, for the year, in the same manner and to the same extent. The test of promotion is by written examination. Some fail, and great is the grief. The duty of the Board in this respect is no doubt to see that no grade shall be overtasked, and that the requirements shall bear fair proportion to age and average ability. Failure will happen nevertheless, from one cause or another—and the consequent trouble is too delicate in its nature, to be met arbitrarily. Still the rule has been, and experience has amply shown, that it is the wisest conduct towards the pupil to require him to remain a second year in the grade from which he has failed to pass. It is an error to suppose that this course ends in discouragement; on the contrary, the majority of instances shows the recovery of lost ground, and sometimes even the highest success in subsequent standing and attainment.

A word may be added touching the numbers in the different grades. The highest Grammar grades will always be the smallest, from the fact that from various causes, many children leave school at an early age. If the number of pupils were sufficient, each grade would include a single class only; but where two classes in contiguous grades are small, they are placed under a single teacher. The further doubling of grades would bring back the old system of mixed schools. There is false judgment in selecting some one school, and determining that from its small numbers and cost of support it is unnecessarily expensive. The schools are to be regarded as a whole, and the expenditures common to all. Every child is somewhere in the general school

and is benefited by the general appropriation, and the huddling or obliteration of grades would disturb and damage all the schools in the same series.

The committee have not been unobservant of the earnest discussion of subjects connected with common school education which has taken place during the year. This discussion is two-fold in character: first, in relation to the heavy cost of public schools; secondly, in relation to methods of education. In this day of financial depression it is not clear to what reduction of expenditure the community may not be compelled to resort. The town has hitherto held to its system of schools, and the Board have been watchful in the disbursement of the money placed in their charge. Any considerable diminution of the appropriation for school purposes will involve a radical change in our school organization and methods, and it is to be hoped that the town will deliberate carefully before disturbing these.

The system and methods which we have adopted, and which we hold in common with other cities and towns are undergoing rigid criticism. It is to be remembered that they are the development of many years' experience, and were originated and have been fostered and guided by some of the best educators in the country. Hitherto they have enjoyed the public confidence, and indeed have been the pride of the Commonwealth. Their early establishment was in the City of Boston, and as the metropolis has enlarged its borders, embracing in effect the smaller adjacent cities and towns, the school system has been accepted as incident to the growth in which we also have been included. It has always been claimed by your committee, that if the future of our children is to be in the community which in this way has become uniform and identical, it is but just they should have equal advantages of education with all other children within the same limits; and influenced by this conviction our schools have been given form accordingly.

The committee are well aware that methods of education

are progressive and largely experimental. The strictures on those which now prevail have been severe, perhaps in some respects just, but new methods have not yet been suggested to take the place of the old. It is not the part of prudence to make sudden and premature change. The public interest in the question is already active, and in due time we may profit by all the light that may be shed upon it.

The town is referred to the special reports of the several sub-committees for information upon the condition of the schools under their charge, respectively.

Mr. L. B. Marshall continues in his position of Musical Instructor. The improvement in singing and knowledge of music is marked, and is due to the skill and diligence of this excellent teacher. Under his direction two mass concerts of school children were given in the Town Hall, which afforded opportunity for the public appreciation of his merit.

At the close of the school year, Miss Caroline C. Turner, who for twenty-one years had been a teacher in our schools, tendered her resignation. The Board entered upon their records their recognition of her long and faithful service, and the assurance that she retired with the love of her pupils, past and present, the gratitude of their parents, and the respect of all for her fidelity and high character.

The new school-house at the Heights, built pursuant to the vote of the town at its meeting in April last, has been completed, and will soon be occupied. It is a fine edifice, ornamental in its structure and location, and creditable to the public spirit and liberality of the town. The details of its cost will be reported by the Building Committee.

The committee commend the public schools to the continued favor of the town. The education of the young is a public duty, second to none other in our civil polity. The discharge of this duty may now be felt as a burden, but an enlightened community will not hesitate to make some

sacrifice in that interest which tends to secure to the Commonwealth in time to come, intelligent and useful citizens.

WM. E. PARMENTER, *Chairman,*
For the Committee.

High School.

The school has passed a most favorable year.

At the end of the summer term, Miss Julia A. Mowry, the first assistant, resigned. Her year of service gave proof of her excellence and accomplishment as a teacher. The Board were fortunate in securing as her successor, Miss Harriet J. Williams.

The school is now under the management of Mr. Stickney as Master, Miss Williams as first and Miss Simmons as second assistant. It numbers fifty-nine pupils, arranged as follows :—

Senior Class,	20
Middle "	12
Junior "	24
Special Students,	3

The school has a larger membership than ever before. The requirements for admission have not been diminished in strictness, and the standard of scholarship has been maintained.

The exercises of the graduating class were held at the end of the summer term, and were received with more than usual interest and commendation.

A new plan for the examination of candidates for admission was adopted. Heretofore it has been the usage to select a day at the end of the term, usually at the beginning of July, and to require the candidates to assemble at the High School-house for examination. The work was done in a single day ; and it can be well understood that the combination of heat, labor and anxiety proved exhaustive to all concerned.

This year the candidates underwent examination in the Grammar school-rooms under the eye of teachers appointed to preside, and with the allowance of two days for the performance of the work. The former trouble has thus been obviated, and a fairer result has been obtained.

Two young men entered Harvard University and one young woman entered Wellesley College, all with special credit.

The attention of the town is called to the admirable record of attendance on the part of the members of the High School. The record of faithfulness in study if made public would prove equally remarkable.

There is every reason to be satisfied with the condition of this school. The teachers are competent and devoted, the pupils, as a rule, are diligent, and its position and character are felt through all the schools. It is now at the point of its greatest strength and promise.

WM. E. PARMENTER,
For the Sub-Committee.

Russell Grammar School.

(*First, Second and Third Grades.*)

The success of former years fully attends the higher grades of this school. The attendance has been a little below the average, owing principally to sickness among the pupils, which in some cases was of such a nature as to keep from school for a while all the children of some families.

The progress during the year has been quite satisfactory, and shows a good record for school work.

The classes have remained under the same management as during previous years, until the close of the month of November, at which time, Miss C. C. Turner, who has been long connected with this school, and has so competently and faithfully performed her duties as a teacher, sent in her

resignation to the School Board, which was accepted with many regrets.

On the resignation of Miss Turner, the class under her instruction was assigned to Miss Lizzie A. Gould, who comes to us with the results of a successful experience.

A change of teachers frequently interferes with school work, the pupils often taking advantage of circumstances, until the teacher becomes familiar, but in this instance the committee anticipate the best results.

The success of our Grammar School course, may be measured largely by the number of pupils who graduate at the end of the school year, and are prepared to enter our High School. By a comparative examination with schools in other places, it will be found that the percentage is largely in favor of our own; and while we have this to encourage us, it is a cause of serious regret that so large a proportion of pupils leave our schools before the graduating day arrives. Upon enquiry the committee have been informed that of those pupils who enter the fourth and fifth grades fully one-half leave the schools before finishing their studies in the first class,— and this applies more particularly to the boys than the girls, who from an indifference to study and a desire to rid themselves of the restraints of school life on their part, or perhaps from the inability or indifference on the part of the parents to keep them at school, enter unprepared at an early age, upon the active duties of life. Parents too often leave out of mind that in these days the uneducated are those who toil the hardest with the least recompense; that *skilled* labor brings the *largest reward;* that a thorough Grammar School education, if nothing more, may be the entire capital these boys may have to start in life with, and the committee would take this occasion to urge parents and guardians to use their utmost endeavors to keep their children in school, that all its benefits may be derived.

D. F. Jones,
In behalf of the Sub-Committee.

Russell Grammar School.

(Fourth, Fifth and Sixth Grades.)

These classes are under the same instructors as last year, except the fourth class, taught by Miss A. Pillsbury for a number of years. On account of sickness she was not able to resume her duties at the commencement of the school year, and the vacancy was filled by Miss A. M. Frost of Worcester, who has labored under the disadvantages which substitutes generally experience, scholars taking more license under a substitute than under a regular teacher. At first it seemed that she would not succeed with the class, but by perseverance on the part of the teacher, there is a manifest improvement, and the committee hope and believe, the class will do its allotted work for the year.

Miss Pillsbury is one of the tried and faithful teachers, who has taught with ability and marked success, and it is the earnest wish of the committee that she may soon be able to resume her duties.

On account of the large number of scholars in the sixth grade, it was found necessary to divide it, as last year. This class receives not only the scholars promoted from the first primary class, but also those promoted from the East District, thus forming a very large class, more than can be accommodated in one room, or taught by one teacher.

J. S. Crosby,
For the Sub-Committee.

Russell Primary Schools.

These schools still continue in the hands of Misses Schouler, Packard and Fessenden, all of whom are peculiarly qualified for their charge, and enjoy the confidence of the district. The attendance has been good, taking into account the youth of the children and their liability to sickness. The

work accomplished in these schools is likely to escape attention, and the constant tact and patient industry bestowed by these teachers in their daily duty are appreciable in results only as their pupils pass into the upper grades. In no part of the system of schools is there more imperative requirement for careful and intelligent instruction than in this group of the youngest classes.

WM. E. PARMENTER,
For the Sub-Committee.

Cutter Schools.

The schools of this district, with one exception, remain under the instruction of the same teachers as heretofore. Mrs. Thompson was appointed permanent teacher, in April, to the Second Primary in the place of Miss Woods.

There is no need to particularize concerning the condition of these schools beyond the fact that the teachers are faithful and efficient in their work, the result of which may be seen in the excellent discipline, and in the steady advancement the scholars make in their studies. There is also a marked improvement in the average attendance.

HENRY SWAN,
For the Sub-Committee.

East District.

These schools continue under the same teachers as last year,—Miss Scanlan and Miss Bowers. No changes have been made in the methods of discipline or instruction. Miss Scanlan was obliged in one instance to temporarily suspend a scholar for misconduct, but he speedily returned with a suitable apology, and was restored to the school.

These teachers continue to command the respect of the scholars and the confidence of the parents and committee.

JOHN P. WYMAN,
For the Sub-Committee.

Heights Primary.

The Primary School at the Heights has prospered satisfactorily during the past year under the faithful care of Miss L. M. Farrington. It has numbered from 25 to 42 scholars — a considerable increase over any prior year. Teachers and scholars are awaiting impatiently for the opening of the new school-house, which will probably occur as soon as the building can be thoroughly dried out.

FRANCIS V. B. KERN,
For the Sub-Committee.

SELECTMEN'S REPORT.

In presenting this, our first report, in regard to the highways, we beg leave to refer to the report of the Superintendent of Streets to the Selectmen, in which we have the following items of interest.

Amount of appropriation in March,	$6,000 00
" " " Sept.,	1,500 00
Received for labor, concreting, &c.,	880 00
	$8,380 00
Expended,	8,337 40
Balance unexpended,	$42 60

We find that it has been the practice for a number of years to leave some bills due the very last of the year to be paid the following year; this we have tried to remedy. There has been paid for unpaid bills of 1876-77, $702.25; $38.81 of same being paid since April 1st.

There was remaining of the appropriation in the Treasury April 1st, $3,823.65, of which has been paid for bills due from January 1st to April 1st, the sum of $284.56.

There are no known bills due by this department to date.

We think we can confidently assert that, although some work has been left unperformed (for lack of funds), there has been no considerable amount expended upon the streets which was not an actual necessity.

The following is a summary of the work performed by this department during nine months, ending Dec. 31, 1878:

Total number of loads of gravel placed upon the streets, including 831 loads of stone, 5,096.

Quite an amount has been teamed a long distance, as will be perceived by the number placed upon each street.

Arlington Av.,	1,218	loads	Mystic Street,	829	loads
Appleton Street,	4	"	Mill "	37	"
Academy "	17	"	No. Union "	81	"
Brattle "	74	"	Park "	2	"
Broadway,	15	"	Park Av.,	87	"
Bacon "	9	"	Pleasant Street,	580	"
Central "	54	"	Russell "	5	"
Court "	6	"	Schouler Court,	40	"
Dudley "	39	"	Summer Street,	92	"
Decatur "	14	"	Spring Place,	12	"
Forest "	86	"	Tufts Street,	694	"
Grove "	93	"	Walnut Street,	3	"
Lowell "	2	"	Water "	42	"
Lake "	758	"	Warren "	38	"
Mt. Vernon "	49	"	Winter "	116	"
Total,				5,096	"

Arlington Avenue.

Some portions of this Avenue have been recoated with gravel, which experiment has not proved a success when put on in too great a depth, causing it when wet to be muddy, and the heavy teams to make hollows or depressions, and in dry time to grind up and blow away.

Two sections have been repaired, one from Horse R. R. Station to Mill Street, and one from Steam R. R. track to Medford Street, by the use of crushed stone, in some places

to the depth of 12 inches, coated with blue gravel, and rolled, thus crowning the street so that after heavy rains it becomes dry, and secures to all who pass over it a smooth and easy road. By this method of repairing (for certainly much of the street is flat and rough, and needs to be crowned), the great expense of repicking is saved, and the breaking of the foundation, which can never be more firm than now, is avoided. Should this plan be adopted, and the worst sections repaired each year, in a short time, we think the Avenue would be one of the best and most frequented thoroughfares in this part of New England. That portion of the Avenue from Alewife Brook to Teel Street, and from the old brick school-house to the "Foot of the Rocks," is in need of repairs. But little has been done from the "Foot of the Rocks" to Lexington line, for the reason of lack of funds, and the opinion that when repairs were made they should be quite extensive. There is need of something being done there early in the spring, more than can now be foreseen upon any other street in town. Should the hill at the "Foot of the Rocks" be excavated 3 or 3 1-2 feet and macadamized, the gravel there obtained could be used on Lowell Street, where it is much needed. Considerable trouble and expense has been caused heretofore by the vast amount of water coming from Appleton Street. The culvert at the foot of Appleton Street has been taken up and enlarged, a grate and cesspool put in, which has remedied it in part. After the water leaves this point it has to run nearly on a level, causing the gutters to overflow, and making the street icy in winter. Should a culvert be put across the Avenue from the southerly side to Bow Street, taking the surplus water, running thence to the stream in rear of Elbridge Farmer's, we think no future trouble would be experienced.

Brattle Street.

A portion of this street has been crowned with gravel, and the gutters cleared. It is now in good condition.

Central Street.

That part of this street between the Avenue and Bacon Street, was nearly the whole year wet and muddy. It has been crowned with gravel, and is in good condition.

Forest Street.

The gutters have been cleared, several large stones removed from the road-bed, and a portion regravelled.

Grove Street.

This street is now in very good repair, a part of it having been regravelled. The steep grades either side of the railroad wash somewhat, and require a few loads of gravel annually. The water from Summer Street, formerly deposited itself upon the estate of Mrs. Casey. Gutters and bars have been formed turning it upon the land of Andrew King.

Lowell Street.

With the exception of gathering the loose stones, nothing of any amount has been done. Some portions of this street are very flat and rough, with many springy mud holes, and need repairing very much.

Lake Street.

The first work of the season, was the macadamizing of this street from the residence of Josiah Crosby to the railroad crossing. The old road-bed was removed, a heavy body of crushed stone used, coated with two inches of gravel, thoroughly rolled, and it has stood the wear of the

heavy teaming satisfactorily. The hill leading easterly from Belmont line has been thoroughly repaired with stone and gravel. This part of the street was greatly out of repair having been badly washed, and requiring quite an amount of material to properly crown the centre. The gutters have been cleared, and Lake Street will, we think, need no extended repairs for a long time.

Mt. Vernon Street.

The gutters have been cleared, a portion regravelled, and this street is in good condition.

Mystic Street.

This street has been quite generally repaired. The greater part of the repairs was made on the hill near the Winchester line (called New Mystic), requiring about six hundred loads of material. The gutters have been cleared and the entire length has received attention by covering the low and uneven places with blue gravel.

Park Avenue.

Some repairs were necessitated by the heavy showers of the summer. Two concrete crossings have been put down the past season. The loose stones which, on account of the very steep grade, are constantly working up, have been several times gathered. Some portions will soon have to be regravelled in order to throw the water into the gutters.

Pleasant Street.

Has been coated with gravel the entire length, and is in excellent condition.

Schouler Court.

A portion has been regravelled, gutters cleared and sidewalk raised, which has made a decided change, as heretofore it was wet and muddy a great part of the time. A railing has been put up at the easterly terminus of the street, thus preventing teams from accidentally driving off the embankment.

Summer Street.

The gutters, which in many places were higher than the road-bed, thus throwing all the water upon the street, have been generally cleared. Some new gravel has been used and with one or two exceptions, requiring a few loads of gravel, the street is in good repair.

Tufts Street.

This street was brought to grade during last winter. A large amount of blue gravel was used to properly crown the road-bed, and it is now one of the best streets in town. A sidewalk has been made upon one side of the street with very little expense, as the material used was taken from the gutters on the Avenue. Quite an expense was incurred in putting in the bank walls against the estate of Mrs. Fisher and the one opposite.

Water Street.

That part of the street leading from the railroad easterly, has been repaired and gravelled.

Winter Street.

The portion of this street from the Avenue to the Crosby school-yard, which has been a source of no little complaint (it being most of the year wet and muddy), caused by its

being so low and flat in the centre, and the multiplicity of shade trees (which the abutters object to having removed), has been raised and crowned with gravel, throwing the water off, and thus a portion of the difficulty has been removed. Some other portions of the street need regravelling.

There have been more or less repairs made upon many other streets, as will be perceived by the amount of gravel used. The gutters have been generally cleared, and are in fair condition for the winter.

Guide Boards.

There have been placed in position thirty-five boards, seventeen of which are at the entrance of private ways. With a few exceptions the requirements of law are fulfilled.

Railings.

Substantial railings on embankments have been put up on Academy, Broadway, and Forest Streets, and on the Avenue, near Park Avenue, a total distance of 830 feet in length, a part of which are two-railed, with iron posts.

Watering Streets.

The main avenue has been watered from the residence of Locke Brothers, to that of Mrs. Fisher, and Pleasant Street from the avenue to the residence of Geo. Hill. The number of days the cart has been used is seventy-five and three-fourths. On account of the frequent showers and rains, this season has been quite favorable. Could the abutters from the "Foot of the Rocks" to Alewife Brook, be induced to pay a portion of the expense of watering, and the town make an appropriation for the balance, we think the abutters

would soon see the benefit derived, and the town make a saving in gravel, which is now ground up by travel and blown away in dry seasons.

Culverts and Bridges.

Several culverts have been taken up, and cleared out, and some that were too small to receive the water, have been enlarged.

But slight repairs on wooden bridges have been necessary. The planks of the one on Medford Street, having become worn in the centre, were taken up, cut, and turned, bringing the worn portions on the outer edge. One-half the expense was borne by the town of Medford.

Concreting.

There being no especial appropriation for this purpose, very little has been done. Two crossings have been laid down: one at the junction of Park Avenue with Vine Street, and one at the junction of Park Avenue and Oakland Avenue. Some work has been performed for other parties, as will be shown by report of the Town Treasurer. It would be economy, we think, were several gutters concreted the ensuing year. There are sections at the Heights, which, if much longer delayed, will require a much larger expense, as they are constantly washing, and breaking away the shoulders of the streets.

Stone Crusher and Stone.

The crusher and engine will need some repairs before using. We have a sufficient amount of stone for crushing on hand, for the ensuing season, there being a large quantity at the banks and shed, piled in readiness for use; consequently there will be no necessity for purchasing.

Gravel.

We have opened, the past season, an excellent vein of blue gravel, which to all appearances *may* last for many years. A gutter has been formed, and a culvert put in, taking the surplus water from the pit, the loam removed from the top of the bank, so that gravel can be obtained, comparatively early in the spring.

Sidewalks.

There being no appropriation granted, no walks have been put down. Some portions of the walks need repairs. If funds were granted to lay sections of concrete in the worst places each year, a decided improvement might soon be made. Quite an amount of material obtained from the gutters, has been utilized in raising the low and uneven places, thus disposing of the wash, and making an easy and comfortable walk for pedestrians.

Tools.

Something of an outlay has been made this season for shovels, picks, screens, &c. Since the close of the season, they have all been put in thorough repair, and are in readiness for operation.

Teams.

We have four good horses, in excellent condition. The carts and harnesses being all in good repair, excepting that the carts need painting.

Almshouse.

At the commencement of our duties in the spring, we were under the necessity of procuring a person to take the

place of Mr. Samuel E. Kimball, who resigned, therefore we thought it best to advertise for proposals for the place. After receiving a large number, and carefully considering them all, we made choice of Mr. George W. Austin, and we would here say that thus far he has given full and perfect satisfaction in every department, both at the house and upon the highways. From his report to the Selectmen we gather the following items of interest.

Amount of appropriation,	$1,500 00
" " credit for board and products sold,	300 86
Total resources,	$1,800 86
There has been expended for supplies, furniture, repairs, &c., as per itemized report of Treasurer,	1,793 55
Leaving an unexpended balance of	$7 31
Making the apparent cost,	$1,492 69
Deducting from this for unpaid bills of 1877,	292 64
Would leave the actual cost of support of Superintendent's family, inmates and tramps, repairs, and (household furniture purchased),	$1,200 05
There was unexpended of the appropriation April 1,	894 72
Amount of credits from that date,	240 86
There has been paid for bills due from Jan. 1st to April 1st, including $38.48 for bills of 1877,	118 95

There are no unpaid bills due by this department known to us.

Whole number of inmates for the year, 6; whole number of inmates for nine months, 5; present number, 4; deaths, 1; discharged, 1.

Number of vagrants fed and lodged, not including those cared for at Police Station, 927; decrease in number of vagrants from 1877, 486; number of weeks of support of

inmates, 235; number of weeks of support of vagrants, 133 3-7; aggregate number of weeks of support, 368 3-7.

The general health of the inmates has been very good, the town physician having been required to make only six visits.

Furniture and Fixtures.

There has been expended for furniture, fixtures, &c., which were much needed, about $150.00, and greatly *improved* the furnishing of the house. No very great expense will need to be incurred for some time to come.

Repairs on Buildings.

Some slight repairs have been made on the house the past season. But very little will need to be done at present. As a matter of economy, we think a coat of paint should be put upon the stable and tramp building, the ensuing year; and we also would recommend the erecting of a shed for the storage of wagons, carts, &c., as now some have to remain unsheltered.

Street Lamps.

It will be remembered that at a meeting held April 16th it was voted to light such lamps as should be erected by the abutters on certain streets in the upper part of the town. There have been thus erected 40 lamps, which are lighted by the use of gasoline, and by contract with the Globe Gas Light Co., of Boston, at an expense of $18 per lamp per year. During the two months which they have been lighted, they have given very general satisfaction, furnishing a good light, yet not equal to gas. There are also 51 lamps lighted with gas at a cost of about $26 per lamp. This does not include cost of repairs. It was found that the appropriation would not allow the lighting and care of the lamps to be

done as heretofore; but by an arrangement with the Police, having the work done by them, we have been enabled to keep within the appropriation.

Appropriation,	$1,500 00
Expended,	1,464 19
Balance,	$35 81

Coal.

Adopting the usage of your former Board we have, acting with the School Committee, issued letters inviting proposals from a number of the prominent dealers for our usual supply. The lowest bid of $4.95 per ton being received from Mr. J. W. Peirce, the contract was therefore given to him and has been satisfactorily complied with.

Cemeteries.

As for several years past the care of the cemeteries has been under the charge of Mr. J. B. Hartwell. Following the plan adopted by the former Board, we have caused foliage plants and flowers to be set out in the grounds of the new cemetery to a limited extent.

Police.

Mr. John H. Hartwell was re-appointed Chief of Police, and Garrett Barry and P. J. Shean were appointed as assistants. The report of the Chief to the Selectmen shows the following items of interest.

The following table shows the number of arrests during the past year.

Whole number,	77	
Decrease from last year,	39	
Males,	68	
Females,	9	
		— 77

Drunkenness,	16
Vagrants,	3
Assault and battery,	18
Liquor nuisances,	6
Rape,	2
Disturbing the peace,	11
Assault on officer,	3
Malicious mischief,	2
Trespass,	5
Larceny,	2
Breaking and entering,	1
Other arrests,	8
Total,	77

In addition, five children have been found and returned to their homes, three to Cambridge and two to Boston, and one body drowned in Mystic Lake has been recovered.

Licenses.

The town not having given the Board any instructions in the matter, they thought it best to grant no licenses, feeling that this was all they had a legal right to do, leaving the matter where the law leaves it, in the hands and power of the citizens. The following is an extract of the law: "If two persons, of full age, and competent to testify," "make complaint under oath before a justice of the peace," "that they have reason to believe, and do believe, that any" "spirituous or intoxicating liquor is kept or deposited by a" "person named in the complaint, in a store, shop, ware-" "house, building, vehicle, or place, and intended for sale" "contrary to law, such justice, upon its appearing that" "there is probable cause to believe said complaint to be" "true, shall issue a warrant of search to any sheriff, chief"

"of police, or constable, commanding him to search the" "premises in which it is alleged such liquor is deposited," "and to seize such liquor, with the vessels in which it is" "contained."

And we would here say that the police have been instructed, and they have at all times been ready to prosecute all illegal sales of intoxicating liquors in town, when they have been furnished with the proof of such sales by reliable evidence.

Outside Poor.

Your Overseers have tried to distribute the funds at their disposal, in as economical, yet liberal a manner as the circumstances of each applicant demanded, trying to discriminate between the honest and deserving, and those whom we feared were not so. The following figures will show the result:

Appropriation in March,	$1,600 00
" " Sept.,	500 00
Credited from income poor widows' fund,	200 00
	$2,300 00
Expended,	2,242 01
Balance,	$57 99

Lawsuits.

During the summer we have been called upon to defend the town in a suit brought for damage caused by a collision with the old elm tree near the Cambridge line, the tree having since been removed, the accident having occurred in November of last year. There have been no suits commenced against the town, and to our knowledge, but one threatened during our administration, and that one amicably adjusted, excepting suits connected with the water-works.

Fire Department.

For information regarding this department, we refer you to the report of the Chief Engineer.

Water Scrip.

At the request of the Water Commissioners, Arlington Water Scrip has been issued to furnish funds to enable them to settle damages, &c., according to votes of the town. The same course has been pursued in disposing of the bonds as heretofore, that is, proposals have been issued to the leading bankers and brokers soliciting bids.

Total amount of Scrip sold,		$85,000 00
Jan. 24, Brewster, Basset & Co., $5,000, 6 per cent. Scrip at 110.03,	$5,501 50	
July 18, Charles A. Sweet & Co., $68,000, 5 per cent. Scrip at 101.57,	69,067 60	
Aug. 3, Commissioners of the Sinking Fund, $5,000, 5 per cent. Scrip at 101.57,	5,078 50	
Dec. 2, Brewster, Basset & Co., $7,000, 5 per cent. Scrip at 102.65,	7,185 50	
		$86,833 10
Amount of premiums received on sales,		$1,833 10

Conclusion.

In concluding our report we refer you to the Treasurer's Report for a detailed statement of receipts and expenditures, and beg leave to say that we think we have tried according to the best of our ability to administer the affairs of the

town in as judicious yet liberal a manner as under all the circumstances we were able to do, and keep within the appropriation in all departments. We leave our fellow citizens to judge whether or not we have been right in our endéavors.

Respectfully submitted,

HENRY MOTT,
JAMES DURGIN,
WILLIAM H. ALLEN,
} *Selectmen of Arlington.*

Respectfully submitted,

NATHAN ROBBINS,
DAVID P. GREEN,
WM. G. PECK,
JOHN P. WYMAN,
HENRY SWAN,
B. DELMONT LOCKE, *ex-officio*,

Trustees of Pratt Fund.

ARLINGTON, Dec. 31, 1878.

REPORT OF WATER COMMISSIONERS.

In making our annual report for 1878, we congratulate the town that we are able to show very nearly the exact financial condition of the Water Works. This has been impossible at any former time, on account of the large number of outstanding claims against the town. All bills have been paid up to the present time, and all claims for damages have been settled and paid excepting one, which we think has no foundation in justice, and which we hope the court will decide has none in law. The income from water rates varies but very little from that for 1877. The running expenses have been considerably less than in 1877, and we think that they may be still less for 1879. For all the details of income and expenditure we refer to the Treasurer's report which follows this. In January the suit of Oliver Warner *et als.*, vs. the town was settled by the payment of the round sum of $4,000. In the same month the taxes assessed by Lexington for 1876 and 1877, were paid under protest and a suit brought to recover them. This case has gone to the Supreme Court on an agreed statement of facts and will be argued in January, 1879. In February the preparation of the Great Meadows for a storage reservoir was completed and now, with little care, water can be stored there in sufficient quantity to supply the distributing reservoir and keep it full during the summer.

After the annual town meeting, we met and organized by choosing R. L. Hodgdon, President, and B. D. Locke, Clerk and Registrar. Sylvester Stickney was appointed Superin-

tendent. Subsequently George Hill resigned, and Warren Rawson, having been elected by the town, was sworn in to fill the vacancy.

There has been no extension of the street mains during the year. Gates have been put in at the junction of Maple and Pleasant streets, of Russell and Mystic streets, and of Summer and Brattle streets. A hydrant has been set on Fiske avenue. Wherever new gate or service boxes have been needed, cast-iron ones have been used instead of wooden. The greater durability of iron makes this a measure of economy, though the original cost of iron is a little more than that of wood. Fences have been built between the lands of the Water Works and those of Blodgett and of Winship.

The remaining Mill suits have all been settled on a basis of sixty-five per cent. of the award of the Commissioners. While sharing the almost if not quite universal opinion, that the sum paid in these cases was much in excess of what was justly due, still considering the technical legal advantages held by the claimants, we think the settlement a good one for the town. Mr. Eaton's case was finished before Commissioners, and he appealed to a jury and got a verdict of $1,381.50, a little more than half of the smallest sum for which he ever proposed to settle. Both suits of the Fiske heirs have been settled by paying $450. Reed's case has been tried, and the verdict of the jury was $3,279.71, less than 60 per cent. of what the award of the Commissioners would have amounted to. It has been left for the Supreme Court to decide who shall bear the costs in this case. We have paid them under the order of the court, taking a bond for their return, if the court decides that Reed shall pay them. The suit of Spalding came to trial, and was carried to the Supreme Court on exceptions, and will be argued in January, 1879. This is the only claim brought for damages now remaining unsettled, and this involves only

a small amount. The result in all these cases justifies the course pursued by the town in contesting them.

In the contract for building the Water Works, occurs the following: "The contractor agrees at his own expense, to keep all the foregoing works in repair for five years after completion." In 1875, Mr. Norman paid for all repairs which had been made up to that time. A bill has been sent to him for the repairs which have been done since that time, but he has not yet expressed a willingness to pay it. The Treasurer is now in correspondence with him on the subject.

The amount of Water Scrip issued during the year is $85,000, which, with $215,000 previously issued, makes $300,000, the full amount to which the town is limited. $220,000 of this bearing interest at 6 per cent., and $80,000 at 5 per cent., will make the annual interest to be paid $17,200. Assuming that the net income for 1879, which can be applied to the payment of interest, will be the same as for 1878, or about $8,200, the deficiency for which the town will have to provide will be $9,000.

Amount.	Rate.	Interest.
$220,000	6 per cent.	$13,200
80,000	5 " "	4,000
		$17,200
Deduct estimated net income,		8,200
Deficiency to be provided for,		$9,000

The present works are now in good repair, and are adequate for the supply of the present water takers. The supply of water which the town possesses is sufficient, if takers for domestic purposes can be had, to yield an income large enough to meet the interest on a larger debt than the present, but to provide for the storage of the water and for its distribution would require a considerable additional expenditure. This situation, now fairly before the town, we commend to its careful consideration.

Uses for which water is supplied as reported by the Registrar :—

Families	supplied,	339
Stores and shops	"	16
Private stables	"	64
Livery stables	"	2
Horse railroad stable	"	1

B. DELMONT LOCKE, *Treasurer.*

Sections 15 and 16 of Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely :—

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$5 00
For each additional faucet to be used by the same family,	2 00
Where a house is occupied by more than one family, and less than four, one faucet only being used for all, for each family,	4 00
Where a house is occupied by four or more families, and but one faucet is used by all, for each family,	3 50
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional watet-closet,	3 00
For hopper water-closets, special rates will be made.	
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both; *provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	$10 00
Each additional faucet,	2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OFFICES, WAREHOUSES, ETC., NOT INCLUDING MANUFACTORIES OR WORKSHOPS.

First faucet,	$5 00
When two or more tenants are supplied from the same faucet, each,	4 00
Water-closet used by occupants of one tenement only,	5 00
When used by occupants of more than one tenement, for each tenant,	4 00
For each additional faucet or water-closet, half of above rates will be charged.	

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For market, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$5 to $25

HOTELS.

For each bed for boarders and lodgers,	$3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	$10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	5 00
"	For each additional horse,	4 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, club and boarding stables. For each horse,		3 00
Car and omnibus stables. For each horse,		2 00
Truck and cart stables. For each horse,		2 00

Provided, that in no case shall any stable be charged less than $5.

The rates for stables include water for washing carriages without hose.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets (and the use of the same shall be limited to one hour per day), not less than	3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse power,	6 00

BUILDING PURPOSES.

For each cask of lime or cement, 6 cents.

HYDRANTS.

Hydrants set by the town at the rate of $28 each, allowing one hydrant to each 200 inhabitants.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners; and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases, in their judgment, the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector, for the year 1878; also as Treasurer for the Arlington Water Works for the same year, and find the same correct, with vouchers for all the payments, and the balance of cash to be as stated by him.

ABEL R. PROCTOR,
REUBEN W. HOPKINS, } *Auditors.*

ARLINGTON, Jan. 28, 1879.

ANNUAL REPORT

OF THE

Chief Engineer of the Arlington Fire Department.

To the Selectmen of Arlington:

GENTLEMEN, — I herewith submit my first annual report of the Fire Department, also offering recommendations for the ensuing year.

FIRES AND ALARMS.

The Department has answered to four alarms in town, and three out of town, as follows: March 27, fire at the house of John Redman, Arlington avenue. Extinguished by the neighbors and members of Hose 2. Damage slight. Caused by children playing with matches. May 11, the unoccupied house of Andrew King, on Summer street, at which the entire Department did good service. Damage $411, insured $710; cause unknown. August 7, stable of Wm. Burns, Dudley street, at which the entire Department was called out. Loss $175, insured $135; cause unknown. December 17, stable of Thomas Peirce, at Arlington Heights. Loss $400, no insurance; cause unknown. December 17,

411
175
400
1256

stable of Arlington Land Co., at Arlington Heights. Loss $300, no insurance; cause, sparks from Peirce's barn. The citizens can certainly congratulate themselves upon their immunity from fires in the past year, "but in time of peace prepare for war."

MEMBERSHIP.

The Department consists of thirty-six members, comprising a Chief, and four Assistant Engineers; two Hose companies of twelve men each, and two substitutes to each company, who serve without pay, and are elected members when a vacancy occurs; one Hook and Ladder company of seven men and four substitutes. The Department, as far as membership is concerned, is in good working order. We have been very particular in regard to the persons we have approved to become members, and I must say, that our Fire Department consists of some as good firemen as there are in the State,— men who will not shrink from doing their duty, at the risk of their lives.

HOSE.

The Hose belonging to the Department is in very poor condition. We have only eight hundred and fifty feet that we can rely on. Some of our leather hose will not stand the pressure at the lowest hydrant. If we should have a fire that would require a Steam Fire Engine, our leather hose would not be worth picking up. I would recommend the purchase of one thousand feet of new hose, and from my experience, I am satisfied that cotton rubber-lined hose is the best for this town, and I hope the citizens will look into this matter of hose, and will also take more interest in the Fire Department.

FURTHER FACILITIES.

I would call your attention to the unprotected condition of the property at the Heights. If any of the buildings should take fire, they must burn. If the town should purchase a steamer, it would not be of any use, for there is not water enough to supply it. I can think of nothing better than a Chemical Engine; they are quickly put to work, and will do good service.

DEPARTMENT BUILDINGS.

The house occupied by Hose No. 2 is in very poor condition; in fact it is not a fit place to keep hose or any other part of the apparatus; it is impossible to keep the hose dry, and I hope the citizens in that part of the town, will take interest enough in this matter, to examine the building, and satisfy themselves. We have not expended any money for repairs on this building. Hose house No. 3 needs to be repaired. We have had the windows and doors painted, of which it was sadly in need; also some slating done on the roof.

APPROPRIATION.

I would recommend an appropriation, to meet expenses for the ensuing year, of two thousand five hundred dollars.

PERSONAL RECOGNITION.

In closing, I have to express my thanks to my assistants, and the members of the Fire Department, for the able manner in which they have performed their duty. To the Police, I desire to express my thanks, for the prompt manner in giving alarms and other services. To the Superinten-

dent of streets, for promptness in furnishing horses. To Chief Symms of Winchester, Chief Hopkins of Somerville, and Chief Raymond of Cambridge, for the generous loan of their apparatus in times of need.

Respectfully submitted,

CHARLES GOTT,

Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The whole number of books in the library is, 6,135.

The number of books given out during the year 1878 is, 25,221.

Number of volumes not returned, 9.

Amount of fines paid to the Town Treasurer, $60.

The number of volumes issued during the past year, as compared with former years, shows an increasing interest in the Public Library.

We believe that this institution should be generously supported by the town. In no other way can general knowledge be so widely diffused among the inhabitants of our town, than by placing within the reach of all, good books selected from the current literature of the day. The Trustees wish that all having children under their care, would particularly attend to the books or periodical literature which now falls into their hands.

By a careful direction to a healthful course of reading, a child may be saved from that love for the sensational and trashy novel, which serves only to enfeeble and dissipate the powers of the mind.

There are papers and novelettes now issued and scattered broadcast among young people, which exercise only a pernicious influence. Parents should turn the minds of their children from this course of reading, to the novels, biographies and histories in our Public Library. There our boys and girls can not only be interested, but can gather a healthful course of instruction.

We have introduced four of the leading magazines in English and American periodical literature into the library for the present year. These are to be taken and kept from the library for a period of three days.

We recommend that the town appropriate the amount received from the dog tax, in addition to the amount received from the Pratt Fund, already generously bestowed, for the support of the library for the ensuing year.

JOHN H. HARDY,
Chairman of the Trustees.

SCHOOL COMMITTEE'S REPORT.

To the Town of Arlington:—

The School Committee submit their annual report. They limit themselves to a brief statement of the condition of the several schools, and to a notice of such prominent events as have occurred during the year.

Immediately following the annual March meeting of the town the salaries of the teachers were reduced to conform to the reduction of the appropriation.

The Locke School-house at the Heights was dedicated on the 20th of March. The ceremony of surrendering the house to the town was performed by the delivery of the key by Mr. Kern, the Chairman of the Building Committee, to the Chairman of the Board of Selectmen and by him to the Chairman of the School Committee.

Hon. Mr. Dickinson, the Secretary of the Board of Education, was present by invitation, and gave a most practical and instructive address. Hon. Oliver Warner also addressed the audience to their great pleasure and profit.

The committee ascertained that on the 1st of May there were in the town eight hundred and one children between the ages of five and fifteen.

The committee in recognition of the long and valuable services of Josiah Crosby, Esq., as a member of the School Committee, and as a mark of respect, passed a resolution to the effect that the school-house in the east part of the town should hereafter be known as the "Crosby School-house."

It was ordered that the metric system of weights and measures be taught in our schools and the necessary apparatus was purchased.

As a matter of economy the Schwamb building, which had been occupied by the Cutter Primary, was given up, and the school removed to the school-house, while the Cutter Grammar (5th and 6th classes) was removed to the vacant room in the Locke School-house. At the same time the line dividing the Cutter and Russell districts was changed by carrying it westerly from Schouler court to Highland avenue.

In obedience to a notice from the Massachusetts State Detective Force, the outside doors at the foot of the stairway of the Crosby School-house were made to open outwardly.

During the year there have been resignations and appointments of teachers. At the close of the spring term Miss Josie F. Richardson who had taught the Cutter Primary from its beginning greatly to the satisfaction of all interested in the school, tendered her resignation. Miss L. DeBlois was appointed to the vacancy.

Near the end of the long vacation, Mr. C. W. Stickney, master of the Cotting High School, who had been appointed to take charge of a newly endowed academy in the town of Harvard, withdrew from his situation here. Mr. Stickney during the two years of his mastership gave evidence of superior scholarship and ability as a teacher, thus establishing a reputation which secured for him a more lucrative position. Mr. George F. Chace of the Taunton High School was appointed his successor.

At the close of the fall term Mr. Edward O. Grover, who for thirteen years had been master of the Russell Grammar School, notified the committee that he had been elected to the mastership of the Shepard Grammar School in the City of Cambridge, and that his long service in this town was to cease. Mr. Grover occupies a high rank among grammar

masters, and at several times has received offers of employment as a teacher elsewhere. He is thoroughly versed in the theory and methods of his profession, and has rendered valuable aid in arranging the grades and course of study in our plan of schools. His success as a teacher has been well attested by the thorough instruction evinced by the pupils who have passed under his charge. The friends of public education part with him with regret. Mr. S. J. Dunbar, who has taught the Cutter Grammar School with diligence, ability and success, was appointed to the vacancy. Mr. Charles M. Clay was then appointed to the Cutter School.

Finally, Miss Kate I. Bowers, at the same time, after ten years' service in the Crosby Primary, resigned. In addition to other gifts, Miss Bowers, by a fortunate temperament, was enabled to exert the happiest influence over the young children in her school. Miss Annie A. Snelling was appointed as her successor.

The system of schools remains unchanged. Their condi tion as a whole is favorable. At all events there is no special defect to which the attention of the town need be called.

The schools need the sympathy and support of the community. Outside dissatisfaction, well or ill-founded, freely expressed, tells upon the order and discipline of the schools. The committee commend the wants of the public schools, to the careful, deliberate and intelligent judgment and action of the town.

WM. E. PARMENTER, *Chairman*,
For the School Committee.

Cotting High School.

Mr. Chace assumed the mastership of the school in September. Miss Williams and Miss Simmons have continued as assistants from last year.

The graduating class consisted of twenty members, by far the largest class since the foundation of the school.

One young man, a graduate, entered at Tufts College.

Twenty-eight candidates were admitted to the Junior class on examination.

The school numbers sixty members.

WM. E. PARMENTER,
For the Sub-Committee.

Russell Grammar School.

(*First, Second and Third Grades.*)

These schools have maintained their high rank under the careful management of Mr. Grover, Miss Hobart and Miss Gould.

The attendance has not been so large as it should be, but the average is a little better than last year. Parents should realize that it is of the utmost importance that children be regular in their attendance at school, especially in the schools of higher grades.

Good progress has been made as is shown by the general excellence of the tests.

Apparatus and charts have been introduced for the purpose of illustrating and teaching the metric system, which will undoubtedly be in practical use when the boys of these schools are ready to enter business life.

The committee, generally, felt that it was a misfortune to lose Mr. Grover's valuable services, but they congratulate themselves that so faithful and experienced a teacher as Mr. Dunbar is at the head of the Russell Schools.

In a year's trial, Miss Gould has proved herself to be an intelligent teacher, a good disciplinarian and is regarded as a worthy successor to Miss Turner.

CHAS. E. GOODWIN,
For the Sub-Committee.

Russell Grammar School.

(*Fourth, Fifth and Sixth Grades.*)

The classes in these grades are very large, except the sixth which is divided. The fifth has sixty-two scholars, and to accommodate them the committee were obliged to re-seat the room and add one row more of chairs, also six portable ones. The fourth class has fifty-one desks, all of which are occupied.

When we consider the number of the sixth class (87) and the crowded condition of the fourth and fifth, it is apparent that a new school must be created in the Russell district at the beginning of the next school year.

The sixth class (divided) is taught by Miss Warren and Mrs. Hill; the fifth by Miss Flanders, and although the class is very large, she seems to manage it with ease; good discipline is maintained and interest manifested by the pupils.

Miss Pillsbury has returned to the charge of the fourth class, and her presence and tact have restored the class to its former rank.

J. S. CROSBY,
For the Sub-Committee.

Russell Primary Schools.

The brief notice which these schools ordinarily receive in the report, is all too little to do justice to the excellent management of Misses Schouler, Packard and Fessenden, in their respective classes. The record of one year in these schools is that of every year, showing kindness, patience and tact in the direction of the youngest minds in the first

degrees of knowledge. The usual winter sickness has prevailed among the children, of course occasioning absence from school.

WM. E. PARMENTER,
For the Sub-Committee.

East District.

This school has, during the last year, received a new name, that of the CROSBY SCHOOL. This school is divided into two classes. The intermediate has continued under the care of Miss M. F. Scanlan, who has shown herself still faithful and efficient.

The primary department was under the care of Miss K. I. Bowers, until the beginning of the new year, when Miss Annie A. Snelling was appointed to succeed her. This school is poorly attended in the severe season, the pupils being small, find it difficult to attend in winter. This fact, perhaps, may raise the question whether our school terms and vacations are arranged for the best results in the primary schools.

On the whole, perhaps the success of this school will bear a favorable comparison with others of the same grade in other parts of the town.

JOHN P. WYMAN,
For the Sub-Committee.

Cutter Schools.

There have been several changes in these schools during the year. On the resignation of Miss Richardson, at the close of the winter term, the "Schwamb building" was given up, and the scholars were sent to the Cutter schoolhouse. The classes were assigned to Miss DeBlois, a former teacher of this grade. To make room for this school, it was

found necessary to remove the fifth and sixth grades, taught by Miss Gibbs, to the Locke school-house, at the Heights.

After a faithful and successful service of several years, Mr. Dunbar was transferred to the Russell School, and Mr. Clay, of Brookfield, appointed as his successor.

The other schools, under the same teachers as last year, Mrs. Thompson and Miss Locke, are doing as well as can be expected, considering the amount of absenteeism.

The schools in this district have suffered considerably from the repeated absence of scholars who have been detained at home, in many instances for trivial causes. A continuation of this must necessarily lower the standard for promotion, and it is hoped that during the coming year, there will be an improvement in this direction.

HENRY SWAN,
For the Sub-Committee.

Locke Primary Schools.

The two primary schools occupying the lower half of the Locke school-house are doing well, under the efficient care of Miss L. M. Farrington and Miss S. F. Gibbs, who have used their respective rooms, the former about ten months, the latter somewhat less.

During the first term of Miss Gibbs' school considerable complaint was made of the distance some of the children were compelled to travel, and the average attendance was much lessened, but the committee were unable to make any change for the better, and the difficulty complained of seems now to have been generally overcome, and the school at the present time shows an average attendance of 46 out of 53 scholars.

The committee were obliged to crowd this school-room with more desks than it was intended to accommodate, and consequently, perhaps the means of ventilation have been complained of.

The attendance in Miss Farrington's school has been very much decreased during the current term, by sickness and dread of sickness; the committee hope, however, that parents will consider how difficult it is for their children to make satisfactory progress in their studies, and pass creditable examinations, unless they are constant attendants, and will not allow them to absent themselves except for urgent reasons.

FRANCIS V. B. KERN,
For the Sub-Committee.

SELECTMEN'S REPORT.

In accordance with the usual custom, the Selectmen herewith submit to you their Annual Report of the financial year, ending December 31, 1879 :

Highways.

Appropriation,		$7,000 00
Brick and concrete walks,		500 00
		$7,500 00
Expended,	$8,581 04	
Less amount received for concreting, labor, subscription for watering streets, &c.,	1,700 82	
		6,880 22
Balance unexpended,		$619 78

For a detailed report of the Highway Department, we beg leave to refer to the Report of the Superintendent of Streets to the Selectmen, from which we make the following extracts :

Total number loads of gravel used, 5,644; loads of stone, 1,820; making over 2,500 tons of crushed stone used.

Arlington Av.,	1,934 loads	Lake Street,	66 loads
Appleton Street,	26 "	Mystic "	143 "
Bow "	39 "	Medford "	494 "
Brattle "	33 "	Oakland Av.,	175 "
Broadway,	11 "	Park "	216 "
Claremont Av.,	1,699 "	Pine Street,	36 "
Chestnut Street,	40 "	River "	3 "
Decatur "	164 "	Summer "	34 "
Eastern Av.,	10 "	Spring "	226 "
Forest Street,	20 "	Winter "	19 "
Grove "	14 "	Walnut "	12 "
Lowell "	1,608 "	Wollaston Av.,	442 "
Total,			7,464 loads

In addition, about 500 loads of material have been used upon sidewalks.

Arlington Avenue.

The first work of any magnitude, as was recommended in my last report, was on that portion of the avenue from the old brick School-house, over the hill at the foot of the Rocks, a distance of 2,000 feet.

The hill was excavated a depth of three feet at the highest point, which has left a very easy grade. The whole was macadamized with crushed stone, coated with blue gravel, and is now one of the best portions of the avenue. The gravel, about 1,600 loads, taken from the hill, was utilized upon Lowell Street, thereby much improving that street; the whole being done at less than the estimated cost of excavating and macadamizing that part of the avenue.

Hollows or depressions have been repaired during the season by filling with fine crushed stone. I find this experiment has proved a success, inasmuch as the foundation of the street has been left intact, and the expense of picking has been saved. It was thought that stone thus used would not remain but work out by the action of the wheels; but I find that by putting it on when the street is wet, with a very little fine screened gravel, it treads and becomes one solid portion of the macadamized roadbed. I would suggest, as in my last report, that that part of the avenue from Alewife Brook to a point near the residence of H. D. Durgin, be scraped and crowned with stone and gravel. Also the section from Pattee's crossing to Water Street, which is almost always wet and muddy, and has become very rough and uneven, demands early attention. Nothing has been done upon the section near Lexington line, except to fill the ruts with cracked stone. I recommend that a part or the whole be macadamized the ensuing year, and you will thereby secure a macadamized street, the entire length of the town.

Appleton Street.

The brush has been cut, gutters cleared, and some gravel used. Repairs are needed on the upper portion, near Lexington.

Broadway.

No general repairs have been made this year upon this street. The portion from Warren Street to Alewife Brook needs early attention. In fact, something will soon need to be done the entire length from Webster Street.

Bow Street.

The great amount of surface water coming from the avenue into this street has caused a great deal of trouble to

the residents and the travelling public, by its overflowing and freezing in winter, at times rendering it almost impassable. A culvert and water grate have been put in near the house of A. W. Isle, carrying the water through the land of Elbridge Farmer to the stream in the rear. This will, I think, obviate the difficulty.

Claremont Avenue.

This street, recently accepted by the town, has been placed in good condition. The loam was removed, the hill near Wollaston Avenue excavated, and the entire length at a width of 25 feet, crowned with blue gravel. A portion near Florence Avenue, which was very wet and springy, was filled to a depth of 15 inches with field and cobble stones. Although the material for this, and two other streets, of which mention will be made hereafter, had to be hauled quite a distance, and up a very steep grade, the work has been accomplished for something less than the original estimate.

Chestnut Street.

This street has been lightly coated with gravel, the gutters cleared, and is in a very good condition.

Decatur Street.

This street, although having been sometime accepted, has never been fully completed. The section near River Street, has this year been located and graded. A few loads of gravel are needed near North Union Street, which will place it in fair condition.

Lowell Street.

About half the length of this street has been crowned, and gravelled. The material used came from the hill, ex-

cavated on the main avenue, consequently the expense was not great. The remaining part of the street very much needs repair. That portion near the reservoir being very flat and wet, caused by numerous springs, should be repaired principally with stone.

Medford Street.

A section of this street, from Arlington Avenue to the house of Chas. Gott, has been crowned with from 8 to 10 inches of crushed stone and 2 inches of screened gravel, thoroughly rolled, which now makes a very even, smooth road. The remainder is in a rough, uneven condition, and another section, if not the whole, should be repaired the ensuing season.

Oakland Avenue

Recently accepted as a town way, has been gravelled and put in good condition.

Park Avenue.

A portion of this avenue has been regravelled in the centre, and is now in a very good condition. The material used was furnished by Dr. Dio Lewis, and, being in the vicinity of the place where needed, the expense was comparatively small.

Winter Street

Is quite rough and uneven, and some portions, flat and muddy, need repair. There being considerable heavy teaming through this street, it should be repaired principally with stone.

Wollaston Avenue

Another street recently accepted by the town, has been put in good condition by crowning with stone and gravel.

Guide Boards.

No new boards have been erected this year. Those in position are generally in good condition. A few will be needed to fulfil the requirements of law.

Watering Streets.

In addition to the former route, a subscription was taken on the upper portion of the avenue, and the route extended to the foot of the Rocks, and easterly, to the residence of Mrs. Butterfield, which necessitated erecting three additional stand-pipes, also the procuring of another watering-cart. Not being certain of the continuance of the experiment another year, the purchase of a second cart was not warranted, and one was hired for the season.

Culverts and Bridges.

No repairs have been made on bridges. The bridge on Medford Street needs examination the coming season. Several culverts have been taken up and repaired, and two new ones put in.

Stone Crusher and Stone.

The Engine and Crusher have been put in thorough repair. There is a large amount of stone piled in the yard and shed, ready for crushing, nearly, if not quite enough, for the ensuing season without purchasing.

Concreting.

Concreting has been done in front of Town Hall, and the residences of Mrs. Thayer, Rufus Merrill, Rev. M. Harkins and Chas. Gott; one-half expense being paid by the abutters, the other half from the appropriation for sidewalks. Considerable has been done for individuals, as will be seen in the Treasurer's Report. Sections of concrete gutters have been put in Park Avenue, Medford and Mystic Streets. More are needed on Park Avenue and on Mystic Street from Arlington Avenue to the foot of the hill near the house of J. H. Hartwell. Some of the sidewalks on Arlington Avenue will soon need repairs.

A few more foot crossings would be very convenient.

Gutters.

The gutters have been generally cleared, and are in readiness for winter. The gravel taken from the gutters has been d upon the sidewalks, and the loam sold.

Sidewalks

Have been built and repaired on Park Avenue, Broadway, Claremont Avenue, Arlington Avenue, Medford, Mystic, Appleton, Chestnut and Warren Streets, and including the concrete walks heretofore mentioned, at an expense of $336.80, leaving an unexpended balance of the appropriation of $161.20.

Tools.

The tools have been kept up to the full value of last year and are all in repair, ready for use in the spring.

Teams.

The horses are the same as last year, and are in good condition. The carts have been painted, and with the harnesses, are in good repair.

Almshouse.

The Almshouse has been under the care of Mr. George W. Austin, with his wife as Matron, and we would here say that everything in and about the premises has been kept in excellent order and condition. From Mr. Austin's Report we make the following extracts:

Appropriation,		$1,500 00
Expended,	$1,988 27	
Less received for board and products sold,	500 87	
		1,487 40
Balance unexpended,		$12 60

Whole number of inmates for the year, 8. Deaths, 1. Discharged, 2. Present number, 5.

Number of vagrants fed and lodged, not including those cared for at the Police Station, 641.

The furniture and fixtures of the house have been kept up fully equal to the condition of last year. As was recommended, an addition has been made to the stable for the housing of carts and wagons, with a general storeroom overhead, at an expense of $250.80. The stable and sheds have been painted, and are now in good condition.

An improvement has been made in the drainage of the house and stable, by the putting in of new drains, which was considered necessary in a sanitary point.

Street Lamps.

There are 52 lamps lighted with gas, one having been erected within the year on Winter Street. The cost per lamp has been about $20.10. There are also 45 lamps lighted with gasoline, 5 having been erected on Lake Street. The cost of lighting with gasoline has been $18 per lamp; this does not include repairs. All the lamps and posts are now in thorough repair, having been painted and glazed where needed. Many of the stopcocks having become worn, it was thought best to replace them all with new ones of another pattern, which has been done. The gas lamps have been lighted and cared for by two of the Police.

Appropriation,	$2,100 00
Expended,	1,961 38
Balance unexpended,	$138 62

Coal.

Letters were issued inviting proposals for furnishing the supply needed for the town including the Schools, and the contract was given to Mr. J. W. Peirce for $4.35 per ton, and has been satisfactorily carried out.

Cemeteries.

The cemeteries have been under the care of Mr. John B. Hartwell, and foliage plants and flowers have been set in two or more beds, under the direction of Mr. Dinsmore.

Appropriation,	$300 00
Expended,	261 90
Balance unexpended,	$38 10

Police.

The Selectmen appointed as Police, Mr. John H. Hartwell as Chief; Mr. P. J. Shean and Mr. G. Barry as assistants.

Appropriation,	$1,600 00
Expended,	1,595 75
Balance unexpended,	$4 25

From the Report of the Chief we make the following extracts:

Whole number of arrests during the year,	108	
Increase over last year,	31	
Males,	93	
Females,	15	
		108
Drunkenness,	19	
Vagrants,	3	
Assault and Battery,	30	
Disturbing the peace,	14	
Insane,	2	
Breaking and Entering,	3	
Cruelty to Animals,	2	
Assault on Officer,	2	
Malicious Mischief,	10	
Trespass,	4	
Unlicensed Dogs,	6	
Larceny,	3	
Truants,	2	
Embezzlement,	1	
Obtaining Money under False Pretences,	1	
Other Arrests,	6	
Total,		108

Four children have been found and returned home; two to Boston, and one each to Medford and Cambridge. Twenty-nine tramps have been lodged in the Station House in addition to those sent to the Almshouse.

Licenses.

No licenses have been granted for the sale of intoxicating liquors in town, excepting an Apothecary's license, to Mr. O. W. Whittemore.

Outside Poor.

Appropriation,	$2,300 00
Credited from Income of Poor Widow's Fund,	325 00
	$2,625 00
Expended,	2,616 75
Balance unexpended,	$8 25

Fire Department.

The Report of the Chief Engineer to which we refer you shows the condition of the Department.

Appropriation in March,		$1,800 00
" " November,		200 00
Expended,	$1,895 19	

Conclusion.

In concluding our Report we refer you to the Treasurer's Report, for a detailed statement of receipts and expendi-

tures, feeling that we have tried to act for the best interests of the town, and have kept within the appropriations in our expenditures in all departments, all known bills having been paid, and we leave it to you, fellow citizens, to judge whether or not we have administered the affairs of the town in a judicious manner.

Respectfully submitted,

HENRY MOTT,
WILLIAM H. ALLEN,
JAS. A. BAILEY,
Selectmen of Arlington.

TREASURER'S REPORT.

DAVID P. GREEN,
HENRY SWAN,
B. DELMONT LOCKE, *ex-officio*,

Trustees of Pratt Fund.

ARLINGTON, Dec. 30, 1879.

REPORT OF WATER COMMISSIONERS.

The Annual Report of the Board of Water Commissioners for the year ending Dec. 31, 1879, is herewith submitted. The Board was organized by the choice of Henry Mott, President, and B. Delmont Locke, Clerk and Registrar. Sylvester Stickney was appointed Superintendent. We have had a permanent sluice-way made at the outlet of the Great Meadows, built of stone laid in cement, so that we think we can retain all the water upon the meadows until such time as it shall be needed in the reservoir; we have no doubt that by this means we shall have a large supply of water, but we have found that the present filter is not large enough to supply all the water needed for all purposes, so that the water had to be let into the main pipe for about 25 days, direct from the reservoir, consequently it was not so good; this we think can be remedied. We have had the grass and bushes cleaned out from the rip-rap in the reservoir and for a number of feet around, so that it is now in a good and clean condition. There has been an extension of the main pipe in Chestnut Street from Medford Street; 425 feet of 4-inch cast-iron pipe has been laid, and one 4-inch gate placed in the same.

Also in Academy Street, 432 feet of 4-inch pipe has been laid to the line at the upper end of the street, and one 4-inch gate, and one hydrant placed in the same. One hydrant on Medford Street has been replaced. There have also been 20 service pipes put in for family use and irrigation. The con-

dition of the main pipe in certain localities is such as to call for almost constant repairs, and we think the day is not far distant when it will be necessary to relay certain portions of the same. We have endeavored to keep the works in as good order as possible, under the circumstances, and at the present time they are in fair condition. The income from water rates has been more than last year, and the running expenses have been increased, for a detailed statement of which, we refer you to the Treasurer's Report annexed to this.

The Lexington Tax case, which was referred to the Supreme Court, has been decided, but as the whole question was not settled satisfactorily to both parties, it has again been referred to the Court.

The case of Spalding which was referred to the same court, has been decided in favor of the town. There have been two claims made for damage by flowage of land, which have not yet been settled.

We would recommend the building of a suitable fence to enclose the land on Lowell Street adjoining the reservoir, to keep out animals.

The Treasurer has settled in full with Mr. Norman, the contractor, for repairs of main pipe, chargeable to him under his guaranty.

Uses for which water is supplied as reported by the Registrar:—

Families	supplied,	346
Stores and shops	"	16
Private stables	"	64
Livery stables	"	2
Horse railroad stable	"	1
Steam railroad depot	"	1
Hand hose	"	135
Hotels	"	3

Churches and societies supplied,		7
Town House	"	1
School-houses	"	3
Hose-houses	"	2
Private Fountains	"	2
Irrigation	"	43
Cemetery	"	1
Savings Bank building	"	1
Stone crusher	"	1
Hydrants	"	98

Stock and tools on hand as reported by the Superintendent:—

932 lbs. cast-iron gate boxes.

ARLINGTON, Dec. 31, 1879.

B. DELMONT LOCKE, *Treasurer.*

Sections 15 and 16 of Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely :—

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$5 00
For each additional faucet to be used by the same family,	2 00
Where a house is occupied by more than one family, and less than four, one faucet only being used for all, for each family,	4 00
Where a house is occupied by four or more families, and but one faucet is used by all, for each family,	3 50
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets, special rates will be made.	
Where bath-tubs or water closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both; *provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	$10 00
Each additional faucet,	2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OFFICES, WAREHOUSES, ETC., NOT INCLUDING MANUFACTORIES OR WORKSHOPS.

First faucet,	$5 00
When two or more tenants are supplied from the same faucet, each,	4 00
Water-closet used by occupants of one tenement only,	5 00
When used by occupants of more than one tenement, for each tenant,	4 00

For each additional faucet or water-closet, half of above rates will be charged.

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$5 to $25

HOTELS.

For each bed for boarders and lodgers,	$3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	$10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	5 00
"	For each additional horse,	4 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, club and boarding stables. For each horse,		3 00
Car and Omnibus stables. For each horse,		2 00
Truck and cart stables. For each horse,		2 00

Provided, that in no case shall any stable be charged less than $5.

The rates for stables include water for washing carriages without hose.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets (and the use of the same shall be limited to one hour per day), not less than	3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse power,	6 00

BUILDING PURPOSES.

For each cask of lime or cement, 6 cents.

HYDRANTS.

Hydrants set by the town at the rate of $28 each, allowing one hydrant to each 200 inhabitants.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of Water Commissioners; and the rates fixed in the foregoing tariff may be varied by the Water Commissioners, whenever in particular cases, in their judgment, the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector, for the year 1879; also as Treasurer for the Arlington Water Works for the same year, and find the same correct, with vouchers for all the payments, and the balance of cash to be as stated by him.

ABEL R. PROCTOR,
REUBEN W. HOPKINS, } *Auditors.*

ARLINGTON, Jan. 29, 1880.

ANNUAL REPORT

OF THE

Chief Engineer of the Arlington Fire Department.

To the Selectmen of Arlington:

GENTLEMEN—I herewith submit my Second Annual Report of the Fire Department of this town.

FIRES AND ALARMS.

The department has been called out eleven times during the past year. For six fires in town, three out of town and two false alarms.

The fires in town were as follows: April 24th, house of H. T. Elder, on Crescent Hill. Loss $3,000. Insurance $2,200. Cause of fire unknown.

April 27th, barn of John P. Squire, on Lake Street. The department performed good service at this fire in saving the house connected with the barn. Loss $2,500, no insurance. Cause of fire unknown.

May 25th, house of F. E. Fowle, at the junction of Arlington Avenue and Broadway. The prompt response of the department prevented a serious conflagration. Loss $200. Insurance $2,800. Miss Haley, who occupied the store, suffered a loss of $250, on which there was no insurance. Cause of fire unknown.

Aug. 15th, barn of Wm. H. Richardson, on Brattle Street, to which Hose 2 promptly responded, and did good service in saving adjoining buildings. Loss $200. No insurance. Cause of fire unknown.

Aug. 20th, building belonging to the Estate of Albert Winn, Jr., situated on Arlington Avenue, and occupied by F. A. Fessenden. Loss on building $65. Insurance $1,000. There was a loss on the stock of Mr. Fessenden of $600, with an insurance of $1,000. At this fire the department did well in saving the building. Cause of fire unknown.

Sept. 17th, house of A. Abendroth at Arlington Heights. Loss $3,000. Insurance $2,500. Cause of fire unknown.

MEMBERSHIP.

The membership is the same as that of last year. The pay was reduced ten dollars per man, to conform to the reduction in the appropriation, which caused some dissatisfaction, and the loss of some members.

We find it difficult to fill the companies with such men as we would like.

It has been our sad duty to convey to its last resting place the remains of one of the oldest and best men in the department. I refer to our late foreman Edward B. Moore.

HOSE.

The Hose of the department is in no better condition than last year, and I would call your particular attention to the same. I would recommend the purchase of some new Hose this year.

DEPARTMENT BUILDINGS.

The hose houses are in much the same condition as last year, a few necessary repairs have been made.

I would again call your attention to the unprotected condition of the property in the outskirts of the town.

APPROPRIATIONS.

I would recommend an appropriation of two thousand dollars ($2,000) to meet the expenses of the ensuing year, and am satisfied it is the smallest sum necessary to maintain the department and keep it in good working order.

PERSONAL RECOGNITION.

In closing I desire to express my sincere thanks to my assistants for the able and cheerful manner in which they have assisted me in the discharge of duty.

The members of the department I shall ever remember with feelings of gratitude for their promptness in answering to the calls of fire, and also in obeying the orders of their Chief.

To the Police and the Superintendent of Streets I extend my thanks for many favors.

Respectfully submitted,

CHARLES GOTT,

Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The whole number of books in the Library is, 6,530.

The number of books given out during the year 1879 is, 26,724.

The trustees deemed it advisable not to close the Library for inspection until the summer vacation. Hence we are unable to report the number of volumes missing.

Amount of fines paid to the Town Treasurer, $57.

The increase of the circulation of books shows a deepening interest in our Public Library, and I do not feel that I can add anything to what was said in our report of last year towards its welfare.

We ask that the same amount as given last year be appropriated for the support of the Library for the ensuing year.

JOHN H. HARDY,

For the Trustees.

SCHOOL COMMITTEE'S REPORT.

To the Town of Arlington:

The combined reports of the sub-committees are presented as the Annual Report of the School Committee. They sufficiently show the progress and state of the different schools.

The committee is large enough to admit of a distribution of duties among its members. Still this does not limit their interest in the general management of all the schools. At the meetings of the committee, always fully attended, the condition of the schools is reviewed, and each member becomes well informed upon all essential matters pertaining to them.

There has been more than the usual number of resignations and election of teachers. Indeed, in few towns have the teachers continued longer in service than in this town. The school system tends to make their work simple, clear and well defined, and so long as their compensation has been a reasonable requital of their labor, they have been content to remain. It is due to them to say that their long service has not tended to bring them into fixed and unprogressive habits of teaching, but their intelligence and interest in their calling have prompted them to observe improvements in method, and to take the lead in suggesting their adoption. The schools are the scene of lively and useful work.

Among the resignations are to be included Miss Sarah F. Packard of the Second Russell Primary, whose unsurpassed

qualities as a primary teacher, manifested in her ten years' service, have endeared her to children and parents. Then Miss Evelyn J. Locke of the Cutter Grammar, whom the committee had hoped to keep out of the sight of those who were able to offer better inducements, at least until the time when the town could afford to pay a salary commensurate with her merits, accepted to our great loss and regret, an appointment in the City of Cambridge. Finally, Miss Sarah F. Gibbs, long in the same department, marked as a most diligent and pains-taking teacher, resigned to look for a situation securing larger remuneration.

In the discussion of educational topics at large in the community, two departments are especially brought into question, viz. : high and primary schools. The former have been brought face to face with the economical test, in such manner as not only to make material change probable, but their very existence in the future problematical. The committee have been satisfied to avail themselves of such light as the discussion has thrown upon the character of instruction, and to leave the graver results to be considered when the danger shall be more imminent. The inquiry into primary instruction has reference solely to method, and asks how shall the young mind be directed in its earliest steps in learning how to learn. Our primaries are fortunately not so full as to place the teachers in a crowd of little ones where attention to each would be impossible. The teacher is expected to read, visit and know by observation whatever has been discovered as the best means of bringing into earliest action the faculties which are to be developed all through school life. So far as it appears, the primary teachers, each in her own way, have so applied their knowledge as to release the children from their old drudgery, to teach them to read by word, and to relieve them by change of pastime and some light occupation. Not that this is a new method with the teachers, for it is one in effect which their intelligence long ago brought about.

The instruction in singing has improved from year to year, for the reason that Mr. Marshall has been enabled through his long experience to apply his teaching in a progressive and systematic way, as his pupils advance from class to class. The skill and diligence of the Instructor in Music entitle him to the highest commendation.

The committee, under the law, appointed three truant officers. Truancy has not prevailed to any great extent at any time. It has been necessary for the benefit of example to bring two or three cases before the magistrate, and in these it was found that probation would serve the turn instead of penalty.

The committee ask the continued favor of the town in support of the public schools.

WM. E. PARMENTER, *Chairman*,

For the School Committee.

Cotting High School.

At the close of the school in July, Mr. Geo. F. Chace declined a re-election as Master and has received an appointment in the Academy at Taunton. Miss Harriet J. Williams, the First Assistant, resigned, having been appointed Instructor in Latin at Smith College in Northampton.

Mr. Charles M. Clay was elected Master, and Miss Sarah A. Hamlin, First Assistant.

There were the usual exercises by the graduating class, and a new class was admitted upon examination.

The fifteenth year since the establishment of the school has just expired. The school, well organized by able hands in the beginning, as to its studies and methods, has, in the main, throughout its existence, given the best results of skilful management. It has been fortunate in its teachers, and with rare exceptions, in the excellence of its discipline,

and in harmony in its work. In proof of this we can regard the practical tests of its graduates, some in the college ordeal, others in the profession of teachers, and all perhaps in the indications of character, intelligence and promise.

During the last half year the school has undergone careful revision. Such alterations in the building as its poor condition would admit of, have been made, tending to cleanliness and comfort. The chemical room has been rearranged and supplied with necessary apparatus and articles for experiment, and provision has been made for aids in other scientific studies, especially in the furnishing of models illustrating physiology. Reference books have been purchased in good number and with proper selection.

The most material change affects the course of study. Heretofore, Latin has been a required study for at least one year. By the addition of branches from time to time the number of required studies had become burdensome, for a three years' course. The change contemplates for the completion of the full curriculum, a term of four years; three years, as before, entitling a pupil to a certificate of graduation, and the fourth year, being optional, affording a post-graduate course. In this way, Latin has been made an elective study, to be pursued by those who take it for a longer time than under the former requirement, while for those who prefer a more strictly English course, a proper branch has been substituted. By this arrangement the studies followed contemporaneously by any pupil, are not more than three, and those which had brought excessive work are prolonged into the post-graduate year. The change has permitted a better arrangement, particularly in the departments of science and of English and American literature. The classical course necessarily remains the same, as this must be guided by the requirements for admission to college.

The committee believe that at no time in its history, has the High School been in better hands, or in more favorable

condition than it now is; and they feel assured that it has never before stood higher in the public estimation and confidence.

WM. E. PARMENTER,

For the Sub-Committee.

Russell Grammar School.

(First, Second and Third Grades.)

Within little more than a year's time, the first grade has been under the supervision of three different teachers. Mr. Grover left at the close of the fall term of 1878; Mr. Dunbar succeeded him in January following, and had only fairly got the school into good running order again, when he was taken sick; it was then thought that he would soon recover, and Mr. Wardwell of Boston was engaged in April, as a substitute. Nearly a year has passed, and Mr. Dunbar is still unable to attend to school duties. During this time, Mr. Wardwell has proved to be an able and efficient teacher, fully meeting the expectations of the committee.

The second grade is still under the excellent management of Miss Hobart, and the average attendance is about the same as last year.

Miss Gould still continues as teacher of the third grade, and although her responsibility is increased by the larger attendance, her duties are performed in a satisfactory manner.

CHAS. E. GOODWIN,

For the Sub-Committee.

Russell Grammar School.

(Fourth, Fifth and Sixth Grades.)

The fourth class is still under the charge of Miss Pillsbury.

At the beginning of the school year, the fifth class was so large (78), that it was found necessary to divide it, and portable desks were purchased and placed in the hall, which has proved a very good school-room. The desks can easily be moved, and the hall used entire as formerly. This class as divided is taught by Miss Flanders and Miss Tupper.

The sixth grade, which consists of two classes, is taught by Miss Warren and Miss Carpenter.

We believe these grades are under the charge of competent and efficient teachers.

J. S. CROSBY,
For the Sub-Committee.

Russell Primary Schools.

As regards the condition of these schools, your committee feel that it is one of general excellence. Considering the extreme youth of the pupils, any report relating to scholarship or advancement in learning, can hardly be expected. The system of teaching is largely a matter of discipline in a mild form, an affectionate manner, and preparatory training. The method of "object teaching"—as taught in a small way in these schools—cannot be too highly commended, affording as it does a pleasant and healthful task, at the same time stimulating the young mind and preparing it for practical use.

The first class in this Department is still in charge of Miss Schouler, who has so ably filled the position for several years. In the second class a change was made at the close of the summer term, caused by the resignation of Miss Packard, after ten years of meritorious service in our schools. The vacancy was filled by the appointment of Miss Morrill, with whose management the committee have reason to be pleased. The third class remains in charge of Miss Fessenden. Probably there is no school in town requiring more care and earnestness, and causing so much anxiety on the part of the teacher. We feel that there can

be no higher praise awarded, than to say that it is carefully and zealously managed. The average attendance during the past year has been good; but few cases of absence on account of sickness.

Much complaint is made of the habit which some of the children have of "loitering on the way," while returning to their homes after dismissal from school. The liability to accident, the uncertainty as to their whereabouts, and the influence which such a habit must have on well-disposed children, are matters that should interest all parents and guardians, and it is hoped they will give proper attention to them.

M. MORTON,

For the Sub-Committee.

Crosby Primary Schools.

The two grades in these schools remain under the same instructors as during the year 1879, viz.: Miss M. F. Scanlan and Miss Annie C. Snelling. Miss Scanlan continues in charge of the older scholars, and still retains the confidence of the committee. A large percentage of the first class under her charge were promoted at the commencement of the fall term to a higher grade and are well maintaining their position.

Parents are always anxious when the time for promotion arrives, that their children should take their places with others in a higher grade. The teacher finds it almost impossible to comply with the wishes of the parents, unless their children attend the school regularly and punctually every school-day, and no parent or scholar should expect promotion unless the scholar is duly qualified. The committee are prompted to these remarks by matters happening at the opening of the fall term.

Miss Snelling, having had charge of the second primary, has given entire satisfaction, and the committee consider her faithful and efficient.

In instructing primarians, the daily need of patience and perseverance becomes apparent. The tender age of the scholar requires more than ordinary care as they enter and retire from the school-room, especially in cold and stormy weather.

The attendance at these schools during the year has been a trifle below the average of the former year, but so far during the winter term the per cent. of attendance has been larger than that of last year, and but very little unusual sickness has prevailed among the children.

During the summer vacation, the committee found it necessary to make certain repairs on the school-house and out-buildings. One of the furnaces having become unfit for further use, a new one was substituted, the school-rooms, entries and cellar thoroughly whitewashed and cleansed, and such carpenter's work and painting, as was deemed advisable, done. The committee also found upon examination that the water from the roof was working its way into the cellar, causing dampness to arise therefrom, and in order to avoid this difficulty, the underpinning of the house was repaired and quite an amount of gravel deposited around the building, altering the grade and directing the water away from the house, thereby making it more comfortable and healthful.

D. F. JONES,

For the Sub-Committee.

Cutter Schools.

At the beginning of the fall term Mr. Clay was promoted to the Cotting High School. Mr. H. A. Freeman of Provincetown was appointed as his successor.

After a long and faithful service, one of our best teachers,

Miss Evelyn J. Locke, resigned, to take charge of one of the Cambridge schools. The vacancy has been filled by Miss Mary E. Stiles, of Cambridge.

Miss DeBlois and Mrs. Thompson continue to give satisfaction.

HENRY SWAN,

For the Sub-Committee.

Locke Primary Schools.

The schools in the Locke Building, at Arlington Heights, are progressing well under the efficient care and instruction of Miss Mary L. Peirce and Miss Millie B. Farrington. The latter lady was appointed at the beginning of the present term to fill the vacancy caused by the resignation of Miss Louise M. Farrington on account of ill health, and has proved, it is understood, a teacher very satisfactory to both parents and children.

Miss Peirce is a teacher of long experience and excellent abilities, who was appointed during the summer vacation, to take the place of Miss Sarah F. Gibbs, and is considered by the committee a decided acquisition to the town's roll of teachers.

FRANCIS V. B. KERN,

For the Sub-Committee.

SELECTMEN'S REPORT.

THE undersigned, Selectmen of the Town, herewith make to you the Report of their doings for the financial year ending Dec. 31, 1880: —

Highways.

Appropriation,	$7,500 00
Concrete and brick sidewalks,	500 00
	$8,000 00
Expended,	7,741 93
Balance unexpended,	$258 07

It will be seen by reference to the Treasurer's Report, that the expense of concreting sidewalks abutting the Cemetery and High School premises, was taken from the highway appropriation.

The following extracts are taken from the Report of the Superintendent of Streets to the Selectmen: —

Total number of loads of gravel and stone used, including about 450 loads placed upon the sidewalks, 5,860, and distributed as follows: —

Arlington Ave.,	1,668 loads	Mystic Street,	677 loads
Academy Street,	65 "	Mt. Vernon Street,	38 "
Appleton "	195 "	Pleasant "	199 "
Appleton Court,	85 "	Pond "	27 "
Brattle Street,	15 "	Pine Hill "	8 "
Broadway,	612 "	Park Avenue,	226 "
Bow Street,	17 "	Summer Street,	36 "
Eastern Ave.,	25 "	Spring Valley St.,	11 "
Forest Street,	30 "	Warren Street,	46 "
Grove "	14 "	Walnut "	38 "
Lake "	34 "	Winter "	673 "
Lowell "	39 "	Sidewalks,	450 "
Medford "	632 "		
Total,			5,860 loads

Arlington Avenue.

The first principal work of the season was the repairing of this street, from Pattee's crossing to Water Street, and from Alewife Brook to near Teel Street, which was done by scraping the roadbed, and crowning it with crushed stone and gravel. This method of repairing has proved a success, and these sections are in excellent condition, and bid fair to remain so for some time to come. The portion of the avenue from Park Avenue to Lexington line has been placed in good condition by crowning with stone and gravel. Ruts and hollows have been repaired with finely screened crushed stone.

Academy Street.

This street is in good condition, the gutters having been cleared, and the roadbed re-gravelled from the avenue to the Academy grounds.

Appleton Street.

A part of this street has been re-gravelled, and the hollow near Oakland Avenue has been filled with stone and gravel.

Broadway.

A portion of this street has been thoroughly repaired (about 1,200 feet) by cutting down the shoulders of the roadbed and crowning the centre with blue gravel. Although the material has to be hauled a long distance, making the repairs quite expensive, yet we think that the citizens will see the advisibility of completing the remainder of the street in the same way the ensuing year.

Bow and Forest Streets.

But little has been done upon these two streets, from the fact of the possibility of the county commissioners ordering some alterations or improvements.

Lowell Street.

That part of the street near the reservoir greatly needs to be macadamized the coming season.

Lake Street.

Some portions of this street are becoming rough and uneven, and will have to be repaired with fine cracked stone the coming season.

Medford Street.

About 800 feet of this street, from the residence of Charles Gott to near the residence of H. L. Lawrence, has been macadamized the past season, making now about 1,400 feet of excellent street. We would suggest that the remainder of this street be repaired in the same way early in the coming spring. This, completed, would be one of the best streets in town.

Mystic Street.

About 700 feet of this street, near the estate of William Stowe, has been put in thorough repair with stone and gravel. Also the hollow between Russell and Summer Streets, which

was very flat and muddy in wet seasons, has been placed in good condition, by crowning with stone and gravel. Some other portions of this street will need like repairs the ensuing season. A section of the bank wall adjoining the James Wyman estate will need to be relaid in the spring.

Mount Vernon Street.

The gutters have been cleared, the wash-outs of the summer showers repaired, and the street is now in good condition.

Pleasant Street

Is in good order, yet some portions will need re-gravelling the ensuing year. About 700 feet have been crowned with blue gravel the past season.

Park Avenue.

This street has been partly re-gravelled the past season, and is generally in good condition.

Warren Street.

Some gravel has been used upon this street in filling the uneven places, thus placing it in a fair condition.

Walnut Street.

The gutters have been cleared, the centre of the roadbed crowned, and it is now in excellent repair.

Winter Street.

This street was formerly in a very bad condition, especially in wet seasons. The entire roadway has been placed in thorough repair with stone and gravel, and it is now one of the best roads in this vicinity.

Westminster Avenue.

We have had this street surveyed and a plan of it drawn, and have laid it out at a width of 40 feet; and we would recommend its establishment as a highway at the next March meeting, the abutters having agreed to waive all claims for damages, and to remove all fences and buildings.

The gutters have been cleared in nearly all the streets in town, and are in good condition for the winter.

We think it advisable to repair the streets with crushed stone principally, its cost being but a trifle more than the expense of picking and carting gravel. The total number of loads of gravel used the past year is considerably less than the former year, but nearly all of it has been drawn a long distance.

Guide Boards.

Five new boards have been placed in position; viz., at the corners of Medford, Webster, and Beacon Streets with Warren Street, and corners of Lake and Court Streets with Arlington Avenue. Some few old boards need to be repainted, and some replaced with new ones.

Watering Streets.

As in former years, a subscription was taken, and two carts were run during the season. Three new stand-pipes have been erected to facilitate the work.

Culverts and Bridges.

Several culverts have been taken up and relaid. One new culvert has been put in on Medford Street, and four new water-grates have been laid.

The Weir-river Bridge, on Medford Street, has been replanked, one-half the expense being paid by the town of Medford.

Stone Crusher.

The engine and crusher are in very good repair, but a new belt is needed. There is a large amount of stone in the yard ready for crushing, but perhaps not enough for the coming season. The teams and tools have been kept in good condition and repair, and are of equal value of a year ago.

Concreting.

Quite a large number of yards have been laid in different parts of the town. Where concrete sidewalks have been laid, one-half the expense has been paid by the abutters, as will be seen by the Treasurer's Report. Considerable has been done for individuals.

Concrete Gutters and Crossings.

A concrete gutter, consisting of 143 yards, has been laid on Claremont Avenue, near Wollaston Avenue. This work was very necessary, as during every rain we experienced more or less washing out. Upon several streets in town where they are of steep grade, the gutters should be concreted. Crossings have been laid as follows: two on Arlington Avenue, three on Pleasant Street, at the expense of the town; two on Pleasant, and one on Academy Streets, paid for by individuals; and one at the junction of Park and Arlington Avenues, one-half expense being paid by the Arlington Heights Improvement Society.

Sidewalks

Have been repaired with gravel on Arlington Avenue, Academy, Broadway, Dudley, Central, Medford, Mystic, Pleasant, Summer, and Warren Streets. There has been expended upon sidewalks the sum of $493.75, leaving an unexpended balance of $6.25. Walks on several of the streets very much need re-gravelling at an early day.

Almshouse.

The Almshouse, as for two years previous, has been under the care of Mr. George W. Austin and wife; and, as we believe, the affairs of the house have been conducted in a satisfactory manner.

Appropriation,	$1,400 00
Received for board, products sold, &c.,	445 48
	$1,845 48
Paid for supplies, repairs, &c.,	1,800 51
Unexpended balance,	$44 97

Whole number of inmates supported during the year, 9; discharged, 3; present number, 6. Number of tramps fed and lodged, 212.

Street Lamps.

The same number of lamps as last year have been lighted with gas, namely, 52, at a cost of about $14.07 per lamp; 54 lamps have been lighted with gasoline, at a cost of about $13.15 per lamp, cost of repairs extra. The gas-lamps have been lighted by two of the police, and the gasoline by a person employed by the Globe Gas Light Company.

Coal.

Following the custom of former years, letters were issued asking proposals for furnishing the needed supply for the Town; Mr. J. W. Peirce received the contract for $5.78 per ton, including housing the same.

Cemeteries.

Mr. John B. Hartwell has had the care of the cemeteries the past year. Foliage and flowering plants have been set as heretofore by Mr. Dinsmore.

Police.

The police, appointed by the Selectmen, are Mr. John H. Hartwell as chief, and Mr. P. J. Shean and Mr. G. Barry as assistants.

The following extracts are taken from the Report of Mr. Hartwell to the Selectmen: —

The whole number of arrests,	96		
Decrease from last year,	12		
Males,		89	
Females,		7	
		—	96

CAUSES OF ARRESTS.

Assault and Battery,	20	
Drunkenness,	22	
Larceny,	6	
Malicious Trespass,	10	
Breaking and Entering,	11	
Malicious Mischief,	5	
Evading Car-fare,	4	
Disturbing the Peace,	4	
Larceny from Person,	1	
Rape,	1	
Truancy,	1	
Embezzlement,	1	
Insanity,	1	
Miscellaneous,	9	
	—	96
Whole number of tramps sent by permit to the Almshouse,	193	
Eleven have been kept at the station,	11	
Total,	204	

Being 451 less than in 1879, and a decrease from the year 1877 of 1,209. The town has maintained its usual quietness the past year.

Licenses.

A majority of the Board finding it impossible for them to believe that it would be for the best interest of the Town to have licenses granted for the sale of intoxicating liquors, therefore no licenses have been granted.

Outside Poor.

Appropriation,	$2,300 00
Credit from Poor Widow's Fund,	435 00
	$2,735 00
Expended,	2,721 58
Balance unexpended,	$13 42

Three of the insane poor have died during the year, namely, John Hass, Endor Estabrook, and Levi I. Lombard. There are now three in the Asylum, Mr. Dennis Dunn, George V. Hill, and Margaret Lyons. The appropriation granted has been expended as best we knew how, and the amount expended for Mr. Thomas McCarthy, referred to in the Treasurer's Report, is to be refunded by the State.

Fire Department.

As has been the custom heretofore, we refer to the Report of the Chief Engineer.

Counsel Fees.

In this connection we would say, that after several ineffectual attempts to obtain a settlement in any way with Mr. Daniel Lyons for the board of his daughter in the Asylum, and having good reasons for believing that he was amply able to pay something, suit was brought against him, in which the Court gave judgment in favor of the Town; but he, having filed objections to the ruling of the Court, has carried the case to a higher court for decision.

Conclusion.

The Report of the Treasurer, following this, will give you a detailed statement of receipts and expenditures.

We leave the matter with you, fellow-citizens, to judge whether or not we have acted judiciously in the management of the affairs of the Town.

Respectfully submitted,

HENRY MOTT,
WILLIAM H. ALLEN,
JAS. A. BAILEY,
Selectmen of Arlington.

DAVID P. GREEN,
HENRY SWAN,
B. DELMONT LOCKE, *ex officio*,
} *Trustees of Pratt Fund.*

ARLINGTON, Dec. 31, 1880.

REPORT OF WATER COMMISSIONERS.

The Board convened, immediately after the annual March meeting, and organized by the choice of Henry Mott as President, and B. Delmont Locke, Clerk and Registrar. At a subsequent meeting Sylvester Stickney was chosen Superintendent.

It will be remembered, that at the annual meeting the town appropriated fifteen hundred dollars, to be expended under the direction of the Board, for the increase of our filtering capacity. Under the above appropriation, we have expended upwards of thirteen hundred dollars. The Board made frequent visits to the reservoir, for the purpose of ascertaining the best location for constructing the proposed filter, and, after a full discussion of the whole subject, were unanimously of the opinion, that the most practical plan was to lengthen the present filter. With this view, we caused excavations to be made for a distance of one hundred feet from the terminus of the old filter, in a line parallel with the bank of the reservoir, walling up the sides with heavy stone for foundation, and covering in the whole with a brick arch laid in cement. We have to-day a continuous filtering gallery two hundred and thirty feet in length, with a width of twelve feet at the base. This addition has given a large supply of filtered water; but by no means has it proved to be an adequate supply for the wants of the town.

The marginal soil of the reservoir, so far as it has been tested by experimental excavations, is ill-adapted for filtering purposes. In the construction of the new filter, a single

steam-pump sufficed to free the trench from water, for the workmen; whereas, had we found a good filtering soil, two or three pumps would have been required.

The town of Waltham, with a filtering basin located on the banks of Charles River, covering an area of less than five thousand feet, has never wanted for full supply.

It is a most difficult matter, taking into consideration the almost unprecedented drought which has prevailed for the last seven months, to state with any thing more than guess-work how nearly we have reached the point of filtering all the water required by the town. Certain it is, that, had the town not seen fit to authorize the present extension, the number of hours per day, during the past season, in which we could have drawn a supply from the filter direct, would have been very few. We believe, therefore, that the outlay was a judicious one, although the supply has not been as great as had been expected.

The first year after the construction of the filter, assuming the reservoir to be full, shows its maximum capacity; for the water passing through the great meadows carries vegetable substances held in solution, and these minute particles in their passage through the soil, from reservoir to the filtering gallery, must, to a certain extent, leave a deposit in the filtering soil, which, from constant accessions, will prove a serious obstacle to quick filtration. During the last season, after the excessive drought began, we could only supply water from the filter from early in the morning, until about three o'clock in the afternoon. This alternately drawing from filter and reservoir deteriorates the entire supply: the filtered water passes into the main pipes, already filled from the reservoir, and containing at least the sedimentary deposit of the previous night; so that some hours must necessarily elapse, before the mains are flushed, and the water is received by the taker in as good condition as when it left the filtering gallery.

It is evident that our citizens require, and must have, fil-

tered water for domestic use in full supply ; and the problem before us, is, how to get it with the least outlay.

It is possible, that, by the application of the meter system to all takers using the water for other than domestic purposes, the check upon this enormous waste, which is everywhere apparent, would be sufficiently great to afford a supply from the present filter during the average season; but the introduction of meters would necessitate the appropriation of money, not only for the meter itself, but for the connections which must be made in attaching them to the service-pipes, and the boxing and covering of the meter to protect it from frost. Again, no meter has, as yet, been offered to the public, that gives perfect satisfaction in point of accuracy. If, on the other hand, the town should decide to still further increase the filtering capacity, this can only be done by additional appropriations, and by continued experiments in constructing one or more galleries, until sufficient is stored to satisfy all demands. The expense of a filter on the north side of the reservoir will be much less than on the south side; for no pipe is there required to be laid through a high embankment to connect with the main.

We do not present these points at this time by way of recommending the citizens to adopt either plan, but simply as suggestions, offering a possible solution to the difficulty. Perhaps, in view of the fact that the present filter has never been tried in an average season, it would be as well to let the whole matter rest for another year, or until such time as a fair test can be applied, to show how far we have fallen short of meeting the ordinary requirements of the town.

Uses for which water is supplied, as reported by the Registrar: —

Families	supplied,	356
Stores and shops	"	16
Private stables	"	52
Livery stables	"	2

Horse railroad stable supplied,		1
Steam railroad depot	"	1
Hand hose	"	128
Hotels	"	3
Churches and societies	"	7

Cemetery	"	1
Savings Bank building	"	1
Stone crusher	"	1
Hydrants	"	98

Stock and tools on hand, as reported by the Superintendent: —

95 lbs. cast-iron gate boxes.
460 lbs. 4-inch iron pipe, 23 feet.
2 street service boxes.
1 second-hand street hydrant.
2 hydrant feet.
4 2½-inch hydrant nipples.
4 2½-inch hydrant caps.
2 4½ ft. frost cases.
6 hydrant rods.
1 hydrant centre rod.
5 rubber gaskets.
3½ ft. 12-inch cement-lined pipe.
7 ft. 6-inch cement-lined pipe.
7 ft. 4-inch cement-lined pipe.
73 lbs. manilla rope.
11 yds. rubber cloth.
2 eight-by-four cast-iron branches.
19 lbs. tarred rope, for calking.
2 picks.

1 snow-shovel.
2 pails.
1 hoe.
1 rake.
56 ft. 6-inch cement drain pipe.
5 ft. 6-inch branches drain pipe.
5 ft. 4-inch branches drain pipe.
3 lanterns.
5 gate wrenches.
2 wheelbarrows.
1 Gem meter.

All of which is respectfully submitted.

HENRY MOTT,
JOHN FILLEBROWN,
WILLIAM G. PECK,
} *Water Commissioners.*

ARLINGTON, Dec. 31, 1880.

B. DELMONT LOCKE, *Treasurer.*

Sections 15 and 16 of Rules of Water Works.

SECT. 15. The following rates shall be charged annually for the use of water, namely: —

DWELLING HOUSES.

Occupied by one family, for the first faucet,	$5 00
For each additional faucet, to be used by the same family,	2 00
Where a house is occupied by more than one family, and less than four, one faucet only being used for all, for each family,	4 00
Where a house is occupied by four or more families, and but one faucet is used by all, for each family,	3 50
Where a house is occupied by more than one family, the highest rates will be charged for each family having the water carried into their part of the house.	
For the first bath-tub,	5 00
For each additional bath-tub,	3 00
For the first water-closet,	5 00
For each additional water-closet,	3 00
For hopper water-closets, special rates will be made.	
Where bath-tubs or water-closets are used by more than one family, for each family,	4 00
Where two faucets are used, one for hot and one for cold water, and both emptying into one basin, but one charge will be made for both; *provided*, that in no case shall the charge for the use of water by a private family, exclusive of hose and stable, be more than	25 00

BOARDING HOUSES.

For the first faucet,	$10 00
Each additional faucet,	2 00
Water-closet or bath-tub, when used by boarders,	10 00
Each additional bath-tub or water-closet,	3 00

STORES, OFFICES, WAREHOUSES, ETC., NOT INCLUDING MANUFACTORIES OR WORKSHOPS.

First faucet,	$5 00
When two or more tenants are supplied from the same faucet, each,	4 00
Water-closet used by occupants of one tenement only,	5 00
When used by occupants of more than one tenement, for each tenant,	4 00
For each additional faucet or water-closet, half of above rates will be charged.	

MARKETS, SALOONS, RESTAURANTS, WORKSHOPS.

For markets, saloons, restaurants, workshops, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water,	$5 to $25

HOTELS.

For each bed for boarders and lodgers,	$3 00
For each bath-tub in a hotel,	10 00
For each water-closet in a hotel,	10 00

PUBLIC BATHS.

For one tub in public bath-house,	$10 00
For each additional bath-tub,	5 00
For one water-closet in public bath-house,	10 00
For each additional water-closet,	3 00

STABLES.

Private Stables.	For the first horse,	$5 00
"	For each additional horse,	4 00
"	For one cow,	2 00
"	For each additional cow,	1 00
Livery, club, and boarding stables.	For each horse,	3 00
Car and omnibus stables.	For each horse,	2 00
Truck and cart stables.	For each horse,	2 00

Provided, that in no case shall any stable be charged less than $5.

The rates for stables include water for washing carriages without hose.

HOSE.

For hose of not over three-eighths inch orifice, used for washing windows, sprinkling streets (and the use of the same shall be limited to one hour per day), not less than 3 00

STEAM BOILERS.

For each boiler in use not over twelve hours a day, for each horse-power, $6 00

BUILDING PURPOSES.

For each cask of lime or cement, 6 cents

HYDRANTS.

Hydrants set by the town at the rate of $28 each, allowing one hydrant to each 200 inhabitants.

SECT. 16. When water is required for purposes which are not specified in the foregoing tariff, the rates shall be fixed by the Board of water Commissioners; and the rates fixed in the foregoing tariff may be varied by the Water Commissioners whenever in particular cases, in their judgment, the interests of the town shall require.

AUDITORS' REPORT.

The undersigned hereby certify that they have audited the books and accounts of B. DELMONT LOCKE, as Treasurer and Collector of the Town of Arlington, for the year 1880; also as Treasurer for the Arlington Water Works for the same year: and find the same correct, with vouchers for all the payments, and the balance of cash to be as stated by him.

ABEL R. PROCTOR,
REUBEN W. HOPKINS, } *Auditors.*

ARLINGTON, Jan. 29, 1881.

ANNUAL REPORT

OF THE

CHIEF ENGINEER OF THE ARLINGTON FIRE DEPARTMENT.

To the Selectmen of the Town of Arlington:

GENTLEMEN, — I herewith submit my Third Annual Report of the Fire Department, being for the year 1880.

FIRES AND ALARMS.

The department has been called out six times during the year, as follows: —

May 3d, barn of Mrs. A. G. Peck, Pleasant Street. This was the most serious fire we have had during the year, and the only one that we were obliged to use water on. At this fire the department responded promptly and worked hard; but, owing to the low pressure of water, we were obliged to carry the water to the fire, instead of throwing it on. Loss by this fire $2,500. Insurance $3,000. Cause unknown.

June 17, alarm of fire in High School building. Loss mostly by water from the melted water-pipes. Cause unknown.

September 1, fire in basement of S. Stickney's store. Cause, ignition of oil. Damage slight.

October 12, fire in furniture-store of T. F. O'Brien. Caused by carelessness. Loss $100. Insured $400.

November 18, alarm of fire at S. A. Fowle's drug mills. Cause, bursting of boiler-flue. Damage slight.

MEMBERSHIP.

Same as that of last year, with the exception of the engineers, who were reduced from five to three men, in accordance with the vote passed at the town-meeting of March last. I find it difficult to keep the company full of good men. I would recommend that the pay of the firemen be raised to the old standard of thirty-five dollars per year, and that three additional men be added to hook-and-ladder truck.

HOSE.

The hose is in the same poor condition as represented last year; and, if something is not done soon to renew or repair the same, I fear for the consequences.

I would recommend the purchase of one thousand feet of hose.

DEPARTMENT BUILDINGS.

The buildings are in much the same condition as at the close of the year 1879. There has been no new outlay on the same the past year, 1880.

The floor in house of Hose 3 is in poor condition, and needs repairs. The building occupied by Hose 2 is in too poor a condition to be repaired, and, in my opinion, is an unfit place in which to put the apparatus.

APPROPRIATIONS.

I would recommend an appropriation of twenty-five hundred dollars to meet the expenses of the ensuing year.

I desire to call your attention to our imperfect system of fire-alarm, and think all interested citizens will agree that there should be some change from the present system.

I take this opportunity to thank you for your support, also my assistants and members of the fire-department. I shall ever remember the able manner in which they have performed their duty, with, I trust, as much satisfaction to the public, as they have to me.

Respectfully submitted,

CHARLES GOTT,
Chief Engineer.

REPORT

OF THE

TRUSTEES OF THE PUBLIC LIBRARY.

The expenses of the Library during the past year are fully set forth in the Town Treasurer's report, printed elsewhere. Other items of interest to its friends and supporters appear in the Librarian's statement appended hereto.

Some important changes in the management of the Library have been rendered necessary by the constantly increasing business. The yearly examination formerly took place during the last two weeks of December, at the height of the season when books were in greatest demand. The inconvenience to the public which this occasioned seemed a matter of small importance when readers were few; but it grew serious after the popularity of the Library had become such, that often more than two hundred volumes a day were given out. The time for calling in the books has been postponed to July, when the interest of readers is at its lowest ebb.

The method of giving out books was also changed during the past year. The old ledger system, which serves well for a small library, is found full of embarrassments in a large one, when two or more persons are employed in delivering and receiving books. We have accordingly dispensed with the ledger, at which only one person could conveniently work at a time, and adopted the most approved modern method of

paper slips. It has been proved a very great improvement on the old system in many ways.

Book-cases have been added as they have been required by new books, until but little room remains for further additions in our present quarters. This fact must soon become one of pressing importance to the Town. Not only more liberal space for books will soon be required, but at the same time the establishment of a reading-room cannot be too strongly recommended, or too early provided for. The present usefulness of the Library would be greatly enhanced by such an addition, and it is believed that in no other way could so much be done for the moral and social welfare of the young people of this community.

The Library has for some time been indebted to Mr. C. S. Parker for complete files of "The Arlington Advocate" at the close of each year. These are preserved for future reference.

We are also under obligations to the editor for printing our bi-monthly lists of new books in the columns of "The Advocate." This has been without cost to the Library; but the lists have become numerous, and confusing even to readers who have preserved them all. A supplementary catalogue, therefore, comprising all the additions to the Library, since the large catalogue of 1876, has become necessary, and will be issued at an early day.

J. T. TROWBRIDGE,
For the Trustees.

LIBRARIAN'S STATEMENT.

Number of volumes in the library, July, 1880 .	6,838
Number of magazines taken, weekly and monthly .	9
Books added from July, 1880, to January, 1881 .	199

Whole number added in 1880	504
Number given out in 1880	25,640
Largest number delivered in one day	239
Number not returned to the Library, from January, 1879, to July, 1880	10
Whole number of subscribers, January, 1881	1,332
Fines paid to the Town Treasurer in 1880	$76

LIZZIE J. NEWTON,
Librarian.

SCHOOL COMMITTEE'S REPORT.

The School Committee herewith respectfully submit to the Town their Annual Report.

They believe that they have cause for congratulation in the general prosperity of the schools, in the seeming harmony that has prevailed between teachers and scholars, and in the faithful work that has been performed by the teachers during the past year. In a town where the salaries paid in many instances are not an adequate compensation for the ability or experience desired, it is impossible in the selection of so large a corps of teachers to satisfy the exacting demands of some parents who do not understand the variety of character that must be dealt with in each schoolroom. Strict impartiality in discipline is expected. To many parents it seems a hardship that *their* children should be made to conform to the seemingly rigid rules that would not be required in the management of their children at home. We earnestly urge upon the attention of those who are disposed to complain, a careful examination of the schools where their children are placed, and the cultivation of the acquaintance of the teachers who have them in charge. We know those teachers would gladly welcome any such examination and the suggestions that may be made as to the discipline of such children. It is natural for the child to make complaints at home, which may on investigation prove reasonable or unreasonable; but it is better that conference between the teacher and parent should precede any harsh criticism upon that teacher's action

in the presence of the child. The Committee fortunately have had but little trouble during the past year upon questions of discipline. One or two cases of truancy have been brought to our attention, and one boy has suffered punishment therefor by sentence to confinement in the Reformatory School at Lowell.

We are satisfied that by means of our graded system the best education can be imparted to the greater number of the scholars in our schools. The age at which the majority of our scholars graduate from the Grammar Schools ranges from twelve to fifteen years. If the course of study prescribed for the Grammar Schools, and as taught by our teachers, is thoroughly acquired and understood, we believe that would be a result that would satisfy the people of our town. Certainly it would be a result that could not be acquired by the large majority of our scholars under the former common-school system. I speak of this to reply to the criticisms of some who wonder why their children do not learn more, and object to the constant reviewing and repetition made necessary by the prescribed course for each term and year. What education aims at is the discipline of the mind, and to compel habits of accuracy in the acquirement of knowledge. The opportunity of getting knowledge by observation, reading, and conversation, comes to every one after leaving school or college; but the power to acquire it, to digest the same, to judge of its bearings in every respect, and to express the results of one's thoughts upon such knowledge, must be strengthened in our schools. Strength of the mental powers is only obtained by the complete mastery of the studies proposed to the scholar. The old system of education resulted in educating to a high standard two or three naturally gifted scholars at the expense of the rest of the school.

The High School, as it appears from the report of the sub-committee, is in a prosperous condition. Mr. Clay, with zeal for his work, is untiring in his endeavors to serve the best interests of the school. The number of scholars now fitting

for college, with the high standard required for admission, has imposed upon him much extra work during the past year. We trust that in the coming year the scholars in the college course will be so classified that his services can be devoted to a greater extent to the English studies. Miss Sara A. Hamlin, early in the year, suffered an unfortunate accident, which deprived us of the services of a faithful and painstaking teacher until the beginning of the January term. We are glad to see her again in her former station. In Miss Simmons's department we find that she has succeeded in stimulating to a gratifying degree that enthusiasm for inquiry which is the true criterion of a successful teacher. We believe no parent can afford to have his children forego the advantages of the High School. To some it seems best that the boy of fourteen who graduates from the Grammar School should then commence to learn some trade, or enter upon a mercantile career. This belief oftentimes is encouraged by the boy, who is eager for the excitement of a city life. But it does not seem reasonable, nor does experience prove, that the boy who spends the three years after he leaves the Grammar School as an errand-boy, or an under-clerk, can possess any superior advantages in his whole life career to the one who at seventeen years of age has completed his High School education. We congratulate the school that its former high standard at Harvard has been maintained by James Parmenter, one of the late graduates of the High School, who has received special honor and notice by vote of the faculty. The Committee are glad to announce that the long-needed repairs to the High School buildings and grounds have been completed. These have been made at an expense which we think will be appreciated by the town.

The mastership of the Russell School has been the subject of some change during the past year. Mr. J. H. Wardwell remained in charge of the school until the Summer vacation. With an ample experience as a teacher, he instituted and reformed methods of discipline in the school, which we hope

will confer upon its future management a lasting benefit. Mr. S. J. Dunbar was re-elected for the year, beginning with the Fall term, but on account of his continued ill-health he concluded to resign the position. The Committee wish to express their warm appreciation of the zeal and heartfelt interest in the instruction of his pupils that have been manifested by Mr. Dunbar during his long connection with the Arlington schools. Upon a very short notice the Committee were quite fortunate in the selection of Mr. Henry L. Armes, of Nashua, N. H., as Master of the Russell School, who entered upon his duties in the Fall term. From the examinations of the sub-committee, and my own, we believe that the faithful endeavors of the teachers in the lower grades of the Russell School have shown good results this year, and that those results will challenge comparison with those of any other town with the same advantages as possessed by Arlington.

The Crosby Primary School has been under the charge of Misses Scanlan and Snelling. The reports of the school show that the standard maintained by these teachers in former years is still preserved.

Mr. H. A. Freeman is giving general satisfaction to the Committee in his management of the Cutter School. The other schools in the same building are taught by the same teachers as of last year, and their several classes in the examinations have shown satisfactory progress during the year. On account of the sickness of Miss Stiles, a faithful and active teacher, the Committee were obliged to obtain a substitute. They were fortunate in their ability to employ the services of Miss Caroline C. Turner, who has been so long and so favorably known as a teacher in our schools.

The reports from the Locke School, at the Heights, show that the teachers are efficient in the discharge of their duties, and are giving general satisfaction to the parents of their pupils.

The Committee hope that the parents will freely consult

with the Committee and the teachers, and offer suggestions wherever they see a chance for improvement in our schools.

The schools owe much the last year to the labors of Messrs. Swan, Morton, and Winn, who, in the discharge of their duties as a sanitary committee, have secured such changes and improvements in the system of drainage of the Russell Schoolhouse as to protect the purity of the air of its rooms. Their labors and investigations in all the schools have secured, as we believe, improvements in the ventilation and care of the rooms, which should be impressed upon the teacher's mind as a matter of primary importance.

I close this report with the hope that the town will, in the coming year, appreciate the cause of education by an appropriation adequate to the best educational interests of a municipality surrounded by towns and cities which, in the superiority of their schools and teachers, rank among the best in the United States. In order to retain competent and faithful teachers, we are dependent upon your generous support.

JOHN H. HARDY, *Chairman*,
For the Committee.
